Price and Terms. All prices stated in this catalogue are based on the present market and are subject to change without notice. We have purposely omitted prices on Grains and Grass Seeds because of the market fluctuations, as we believe it to be to the advantage of the purchaser, and we will gladly submit samples and lowest quotations on application.

Our Terms of payment are net cash.

Remittances. All moneys should be sent either by P. O. Money Order, Bank Draft, Registered Letter or Express Money Order.

We deliver all Vegetable and Flower Seeds when bought at the packet, ounce, ¼-pound, ½-pound and 1-pound prices, but when seeds ordered are listed in pints and quarts, postage should be added at the rate of 5 cents per pint and 7 cents per quart. Each additional quart add 2 cents. In all other cases goods will be SHIPPED F. O. B. LEWISTON and no charge for packing.

Bags will be charged as follows:—2-bushel bags 22 cents, $\frac{1}{2}$ -bushel bags 10 cents, peck bags 8 cents, $\frac{1}{2}$ -peck bags 5 cents.

Non-Warranty. While we do not give any warranty, either expressed or implied, as to the productiveness of our seeds, we buy only the best and purest and we carefully test all seeds before putting them on the market. If goods are not accepted on these terms they must be returned at once with all charges paid.

PARCEL POST INFORMATION ON PAGE 10

NCTE.—We would deem it a great favor if our customers, or those wishing to remain on our mailing list, thereby receiving our catalog, would inform us of change in address.

GENERAL LIST

Postage Prepaid on all Flower Seeds in Packets at Prices Quoted.

SPECIAL INDUCEMENTS.

When the money accompanies the order, purchasers of Seeds in packets at catalogue prices may select 25 cents' worth extra packets for each \$1.00 sent. Thus anyone enclosing \$1.00 may order seeds in packets amounting to \$1.25. Two dollars sent to us with the order will pay for seeds in packets amounting to \$2.50, and so on. This offer does not include seeds in collections, by weight or measure, bulbs, plants or anything excepting seeds in packets.

Plants are generally known and described as Annuals, Biennials, and Perennials. The term annual is applied to plants which flower and ripen their seeds the same season. Hardy annuals are those which may be sown in the open ground. Half hardy annuals are those which should be started in the house and transplanted to the garden. The term biennial is applied to plants which flower the second season after planting and then perish. The term perennial is applied to plants which flower the second season after planting, and continue to flower year after year.

ACROCLINIUM. (Everlasting) hhA Pretty Everlasting Flower, fine for winter bouquets. The flowers should be gathered when young. Double White Pkt., 05 Double Pink Pkt., 05

ADONIS. Showy, popular border flowers, remaining a long time in bloom.

Aestivalis. "Flos Adonis." Flowers scarlet. Hardy annual. 1 ft. Pkt., .05

AGERATUM. (Floss-Flower.) hA Blossom continually throughout the summer. Highly prized for bedding out, and valuable for winter blooming indoors.

Imperial Dwarf. Dark blue. 9 in; good for edging. Pkt., .05

ALYSSUM. Very hardy, free blooming dwarf plants, all varieties growing freely in common soil. The pretty, fragrant flowers are much prized for bouquets; excellent for the summer garden.

Saxatile Compactum. Yellow flowers; fine for borders. Perennial. Pkt., .05

Little Gem. White. They grow but three or four inches in height, very compact, of spreading growth, each plant often forming a circle a foot in diameter. Pkt. .05

Alyssum

AMARANTHUS. Ornamental foliage. Very striking and effective decorative plants. Sew early and set out young plants early in June. Annual.

Tricolor. Mixed.—Carmine scarlet, splendid variety. 4 to 5 ft. Pkt., .05

ANTIRRHINUM. (Snapdragon.) Beautiful, hardy, free blooming plants for summer and fall. Flowers the first year from seed as annuals and should be treated as such. Average height. 14 feet.

CANNA. Indian Shot. The luxuriant foliage and superb flower of the Cannas, especially of the new French and Italian races, easily places them foremost among our subtropical bedding plants.

Crozy's Newest Mixture Pkt., .05 Nigricans—Dark red foliage Pkt., .05

Candytuft

CARNATIONS—Marguerite—The earliest of all Carnations, blooming in July or August if sown in spring and continuing till frost. Being half-hardy perennials, a slight protection of coarse straw or pine boughs will preserve them during winter and they will flower profusely the next summer, or they may be potted to bloom during winter in the house. The flowers are large, about eighty per cent. unusally coming double; beautifully fringed and clover scented.

| | Yellow | |
| | Mixed | |

CELOSIA, or Coxcomb. Showy annuals of easy cultivation; producing large, brilliant, comb-like flower heads. They prefer a light soil, and should not be allowed to become crowded if a dwarf habit is desired.

Centaurea Cyanus

CENTAUREA. Flowering Annuals. Imperialis-Giant Corn Flower. The flowers are of enormous size; fragrant, and of the most charming colors, including white, pink, lilac, rose and purple. They are among our best summer flowers for cutting.

Marguerite—White Pkt., .05 Cyanus—Bachelor's Button, mixed Pkt., .05

CHRYSANTHEMUM (Annual Varieties.)
Showy, hardy annuals of easiest cultivation and blooming early in summer. They are most desirable for seashore and mountain gardens. Height, 2 ft.

Double Yellow Pkt., .05 Double White Pkt., .05 Double Mixed Pkt., .05

COBOEA SCANDENS. A fine, rapid growing climber with handsome foliage and large, bell-shaped flowers, green at first, but rapidly changing to a beautiful, deep violet-blue. A well established plant will run about thirty feet in a season, covering a large veranda with handsome foliage and beautiful flowers. Tender perennial. Pkt., .05

COLEUS. Splendid bedding plants, with beautifully colored and handsomely marked foliage. They are easily raised from seed if kept in a warm temperature. Tender peren-

Hybrida Mixed Pkt., .25 CONVOLVULUS MAJOR-Tall Morning Glory. Finest Mixed Pkt., .05

CONVOLVULUS MINOR-Dwarf Morning Glory. Finest Mixed Pkt., .05 Japanese Morning Glory Pkt., .05

COSMOS. This is one of our most useful and beautiful autumn flowers. To get it in bloom early, the seed should be sown in May in the open ground where the plants are desired to bloom, and the seedlings allowed to grow and flower without being trans-

Finest Mixed Pkt., .05

CYPRESS VINE. Ipomoea Quamoclit. Very graceful twining annuals with feathery dark green foliage and star like flowers. Twenty feet. Scarlet Pkt., .05

DAHLIA. The popular flower can be easily raised from seed and flowered the same season. The roots should be placed in dry sand and kept in a cellar where there is no frost during the winter.

Hybrida Pleno Fine Double Mixed Pkt., .10 Single Mixed

DIANTHUS. Chinensis fl. pl. hP. Double Chinese Pinks. Finest Mixed. Pkt., .05 Heddewigii. (Japan Pinks) First-class selected. Mixed Single Pkt., .05

DOLICHOS LABLAB. (Hyacinth Bean.) Purple, 10 feet. Pkt.. .05

ESCHSCHOLTZIA. California Poppy. The bright colors, long duration and dwarf habit of these free-blooming hardy annuals, admirably adapt them for massing and border planting. Height, 1 ft.

California-Yellow, orange center Pkt., .05 California Alba-White Pkt., .05 Mixed Pkt., .05

GOURDS. Luxuriant, climbing annuals, useful in covering arbors, fences or slopes, and bearing gourds which are of interesting forms and colors, 10 to 15 ft. Mixed Pkt., .05

GYPSOPHILA. Infant's Breath. Free flowering, hardy plants; extremely light and graceful, easy of cultivation, and most useful for bouquet and cut-flower work. Height 18 inches.

Mixed Pkt., .05

HELIANTHUS. Sunflower. The large varieties are useful in forming backgrounds of large beds or borders and for distant effects, while the smaller sorts may be planted with scarlet Salvia, Cannas and other tall bedding plants, besides being excellent for cutting. Hardy annuals.

Helianthus

HELICHRYSUM. Everlasting Flower. Showy annuals for beds or borders; useful as dried flowers for winter bouquets, for which use the blooms should be cut before they are fully open, and hung up to dry with the flowers downward if stiff stems are desired. Height 2 ft.

Double Mixed Pkt., .05

Heliotrope

HELIOTROPE. Delightfully fragrant greenhouse perennial; excellent for bedding or indoor cultivation and particularly useful for cutting.

GIANT. Newest large flowering varieties mixed. Pkt., .10

HOLLYHOCK. This ever popular hardy favorite of our gardens has few rivals in majestic grandeur. Hollyhocks succeed best in rich, well-drained soil. They should be lightly protected during winter with pine boughs, coarse straw or other mulch not liable to rot. Seeds sown in July produce fine plants for blooming the following summer. Hardy biennials; 6 to 8 ft.

Chaters Strain. Double finest mixed Pkt., .10 HUMULUS JAPONICA. Japanese Hop. Splendid annual climber of fast growth and very ornamental. 12 ft. Pkt., .05

KOCHIA TRICHOPHILA. (Standing or Sunnmer Cypress.) Splendid ornamental annual of unusual quick growth, forming regular pyramids of about 3 ft. in height. The slender-leaved plants are of a cypress-like appearance during summer, changing their light-green foliage to carmine and blood-red colorings towards autumn; flowers small, scarlet. The plant also called "Burning Bush," is of great value when planted singly or in groups, as well as for pot culture. 3 ft. Pkt. .05

LARKSPUR. Splendid hardy annuals with showy flowers borne on long spikes; white, lilac, and all shades of blue; excellent for cutting. Height 18 inches.

Double Tall. Branching or stock flower mixed. Pkt., .05

LAVENDER. Ornamental hardy perennial, bearing long spikes of very fragrant blue flowers. 18 inches. Pkt. 05

LOBELIA. The Erinus varieties are most valuable for edgings, hanging baskets and vases, blooming profusely from June till frost. Lobelia Cardinalis and its varieties are among our most brilliant autumn flowering perennials.

Crystal Palace Compacta. The darkest blue. Pkt., .05
Finest Mixed Pkt., .05

Porget-me-not.

MYOSOTIS-Forget-Me-Not. Dwarf, halfhardy perennials, bearing a profusion of little, star-shaped flowers. They thrive best in rather moist, shady situations. Most of them will bloom the first year from seed if sown early. If sown in July or August in shaded frames, fine plants will be obtained for spring blooming. They are very beautiful when planted in combination with late spring bulbs, Daisies, Arabis or Golden Alyssum.

Palustris-True Forget-Me-Not. Dark blue, very beautiful; profuse flowering. Pkt., .05

MIGONETTE. Reseda Odorata. most fragrant annual, prized as much for forcing in winter as for the summer garden. The seed should be sown early and the plants as they grow, thinned sufficiently to allow them to branch. The beds should be liberally watered during dry weather.

NICOTIANA Affinis-Annual.

Colossea-Magnificent foliage plant, the young leaves at first tinted with red. It soon attains a height of five or six feet, with leaves often two feet in length, and a foot in width. Excellent for foliage beds. Pkt., .10

Sylvestris. A splendid new variety with glaucous leaves and large pendants, pure white, tube-shaped flowers; a very stately plant. Pkt., .05

PAPAVER, or Poppy. Annual varieties, showy hardy annual of easiest cultivation and embracing many rich and beautiful colors. The seed should be sown early in spring where intended to bloom.

Shirley-Finest mixed. A most charming race of single Poppies with shining flowers of silky texture, varying in color from pure white and delicate pink to rosy carmine and deep crimson; many of them being beautifully striped and edged with white. The blooms

NASTURTIUMS-Dwarf varieties.

Tom Thumb, or Dwarf. These hardy annuals are of easiest cultivation; succeeding best in rather light soil, withstanding heat and drought and flowering profusely from June or July until cut down by severe frost usually well into November. The dark leaved varieties are particularly adapted for ribbon beds and borders, the brilliant flowers contrasting admirably with the bronzy red foliage. Height, 1 ft.

Finest Mixed. Our special mixture of the finest sorts, in great variety of color.

Pkg., .05; oz., 10; 1/4 lb., .30

Nasturtium NASTURTIUMS-Tall or Climbing. Pkg., .05! oz., .10; 1/4 lb., .30

PHLOX DRUMMONDI. This is one of the finest annuals, being hardy, easy of cultivation and making as a summer bedding plant, an effective and brilliant display. The flowers are of long duration and of most gorgeous and varied colors. Height, 1 ft.

Finest Mixed-Splendid colors

Grandiflora Finest Mixed. The flowers are of large size, finely rounded form, and with well defined eyes. The colors are superb.

Pkt., .10

PETUNIA. The Petunia is popular because it is of easiest cultivation, blooms from early summer continuously until frost and is one of the most showy and free-growing annuals. Height, 12 to 15 inches.

Single Flowering Petunias
Hybrida—Finest Mixed Pkt., .10

Pkt., .05
Grandiflora—Fine Single Mixed Pkt., .05

RHODANTHE. Half-hardy annuals with "Everlasting" flowers. They are beautiful for the open garden, or grown in pots for the conservatory. If required for winter use, as dried flowers, they should be cut before they are fully expanded. Height, 1 ft.

RICINUS. Castor Oil Plant. Tender annuals of rapid and gigantic growth, producing enormous dark green or bronze-colored palmate leaves; excellent for sub-tropical beds, or for massive follage effects on lawns or backgrounds.

Zanzibariensis. Mixed. A new and distinct race from East Africa, producing leaves of enormous size, varying in color from light green to purplish red. Helght, 15 ft.

Pkt., .05

PANSIES

Pansy, or Heartease. Too much importance cannot be attached to the culture of these beautiful plants, flowering as they do in great abundance for several months. When sow in the early spring a good display in most cases can be had in the following fall, but the best results are not obtained by so doing. To obtain fine blooms it is better to sow during summer and transplant the seedlings into cold frames in September, protecting during the winter with mats or shutters. Pansies delight in a cool, moist, well-drained soil, enriched with decomposed barnyard manure. They should never be allowed to suffer for want of water.

Blue and Purple

Captain of the Blues. Standard light maroon; wings light purple.

Navy Blue. Deep violet blue.

Variegated

Aurora. Flaked orange salmon; largest striped.

American. The brightest blood red striped.

Daybreak. Crimson scarlet on white ground.

Gray Friar. Beautiful watered purple on white ground.

Helen Pierce. Blue mottled on pure white.

Mrs. Joseph Chamberlain. Rose and white striped.

Princess of Wales. Stripped mauve on white ground.

Lavender and Mauve

Countess of Radnor. Pale mauve standards, wings pale lilac, very fine.

Dorothy Tennant. Deep rosy mauve; beautiful.

Emily Eckford. Standard reddish mauve, wings blue.

White

Blanch Burpee. Pure white of superior substance, flowers large and finely formed. Emily Henderson. A new pure white, largest of all and an excellent sort.

Sadie Burpee. White seed. Very large. Pure white.

Dorothy Eckford, Pure White.

Light Yellow

Mrs. Eckford. Delicate shade of primrose yellow.

Primrose. Color pale primrose approaching yellow.

Shades of Pink

Lovely. Large pink standard, delicate rose wings.

Hon. F. Bouverie. Standard flesh-pink, wings rosy buff.

Sybil Eckford. Pink and buff.

Prima Donna. Lovely pale pink. One of the finest

Katherine Tracy. Soft but brilliant pink. Gladys Unwin. Large, light pink.

Blanche Ferry. The popular pink and white.

Her Majesty. Beautiful rose color.

Painted Lady. Old popular pink and white, fiery shade.

Shades of Red

Red Riding Hood. Rosy pink, very fragrant.

Brilliant. Bright scarlet, fine form,

Firefly. Deep brilliant scarlet; truly a fiery shade.

White and Blue

Maid of Honor. White edged with blue.
Lottle Eckford. White, suffused with lavender.

Claret and Maroon

Boreatton. Very dark maroon self-colored. Captivation. Beautiful claret color. Waverly. Standards rosy claret, wings shaded blue.

SALPIGLOSSIS. Half-hardy annuals; elegant late summer flowering plants of great diversity in color; beautifully penciled in rich tints of yellow, purple, and brownish red. Of easy culture.

Grandiflora-Finest Mixed Pkt., .05

SALVIA. Flowering Sage. Very ornamental; flowers borne in spikes of fiery red, crimson or blue, and continue in bloom in open ground until after severe frosts. Start in heat and transplant into light soil one to two feet apart. Tender perennials, but bloom the first season. Height, 2 ft, to 3 ft.

Splendens—Brilliant scarlet ... Pkt., .10 Cocinea—Mixed Pkt., .05

STOCK—Gilliflower. The charming colors, delightful fragrance and free-blooming character of the Stocks have made them favorite plants for both summer and winter cutitvation. They are very effective for beds and borders, and their handsome spikes are invaluable for bouquets and floral decorations.

Large-Flowering Double Ten-Week Varieties. Highest grade, pot-grown seed. The best variety for early summer blooming, producing massive, pyramidal flower spikes of brilliant colors and delightful fragrance. Height 1 ft.

SUPERIOR VEGETABLE SEEDS

ASPARAGUS

German,—Gpargel. French,—Asperge. Spanish,—Esparragos.

One ounce for 60 feet of drill.

A convenient bed is about six feet wide, with a path two feet wide on each side. This will require six rows one foot apart, and a bed of that width 50 feet long will be ample for an ordinary family, requiring about one pound of seed. It will require about three years from the time of sowing until the bed is in full bearing, but once established, it is good for twenty years. It should be sown in drills one foot apart, and when the plants

are four or five inches high they should be thinned out so that the plants will be nine inches apart from each other in all the rows. Great care must be taken for the first year to keep down all weeds as soon as they appear, else they will choke and destroy the young seedling Asparagus. The deeper the soil and the more manure used, the greater will be the crop.

Conover's Colossal. The best known, and one of the most desirable sorts. Pkt., .05; oz., .10; 1/4 lb., .20; lb., .50.

Palmetto. Shoots are very large and light green, also tender and very desirable for the market and home garden. Very quick in growth, with close, round-topped shoots. Pkt., 05; 0z., 10; ½ lb., 25; lb., 75

ASPARAGUS ROOTS

A saving of one to two years is effected by planting roots. These offered below are strong, two-year-old roots, and the proper size for testing. These roots are not carried in stock but will be shipped direct from the growers. Prices on the following varieties will be quoted on application.

Columbia, Mammoth White, Conover's Colossal, Barr's Mammoth and Palmetto,

When in the city make our store your headquarters. Always glad to have strangers and others call and examine our Farm Implements. We carry the largest and most complete stock of any concern in New England.

We give no warranty, expressed or implied, but we buy our Seeds from reputable Seedsmen and we carefully test them before putting on the market. Goods not accepted on these terms must be returned at once, prepaid.

BEANS

Dwarf or Bush

German,—Bohnen. French,—Haricot Spanish,—Frijole nano.

One quart to 100 feet in drills or 150 hills; two bushels to the acre, in drills.

A succession of sowing can be made from the first week in May until August. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted. The seeds should be dropped about two inches apart.

Add .03 per pkg.; .05 per pt.,; .07 per qt., each additional quart add .02 if to be sent by mail.

Packets of all varieties, 5c each.

Wax Pod or Butter Varieties

Black German Wax. (Black Seed.) Very early; round, yellow pods; a well-known standard sort. Pt., .20; qt., .35; pk., \$2.00

Currie's Rust-proof Wax. Pods long, flat and straight, very productive and rust-proof; black seed. Pt., .20; qt., .35; pk., \$2.00

Wardwell's Dwarf Kidney Wax Bean. Hardy and productive, pods long, broad, flat and of a delicate waxy yellow, brittle and entirely stringless. The yield considerably exceeds that of the Common Golden Wax and is equally early. Pt., 20; qt., 35; pk., \$2.00

Improved Golden Wax. Rust proof. An improvement on the old Golden Wax. The pod is somewhat round, meaty and entirely rust proof. Pt., .20; qt., .35; pk., \$2.25

Refugee Wax. A perfect Refugee with long, round, yellow, wax pods. Suitable for early or late planting, and an immense yielder. Pt., .20; qt., .35; pk., \$2.00

Green Pod Varieties

Davis White Kidney Wax. Pods remarkably long, straight, and handsome, waxy white color; enormously productive; seed white. Pt., .20; qt., .35; pk., \$2.00

Stringless Green Pod. The pods are green, not quite so round as Valentine and less curved. The pods are stringless—absolutely—this quality at once placing the variety at the top of the list among table beams.

Pt., .20; qt., .35; pk., \$2.00

Long Yellow Six Weeks. Pods are long, flat, straight, green

Pt., .20; qt., .35; pk., \$2.00

Early Bountiful. Of thrifty growth and very hardy. The stringless and tender flat green pods are produced very early in the season and the bush continues in bearing for a long time. It is practically a stringless Early Yellow Six Weeks.

Pt., .15; qt., .25; pk., \$1.50

BEANS—Continued

Low's Champion. Very productive, with stringless, large green flat pods. Excellent either as a string or shell bean. Pt., 20; qt., 35; pk., \$2.00.

Dwarf Horticultural. The best shell bean for fine quality. Pt., .20; qt., .35; pk., \$2.25.

Old-fashioned Yellow-eye Bean. An excellent field bean and much preferred to the Improved Yelloy-eye as a baking bean.

Pt., .15; qt., .25; pk., \$1.50.

Improved Yellow-eye Bean. An excelent field bean and very productive. Pt., .16; qt., .25; pk., \$1.50.

Red Kidney Bean. An easily raised bean and very productive. Also greatly prized by many for baking. Pt., .10; qt., .20; pk., \$1.50.

LIMA

Burpee's Bush Lima. The only Bush form of the true large Lima. Bushes grow to eighteen inches in height and always erect. Pt., .20; qt., .35; pk., \$2.25.

Pole or Running

German,—Stangen Bohnen. Spanish,—Judias. French,—Haricot a Rames.

One quart to 150 hills; 10 to 12 quarts to the acre in drills.

These are more tender and require rather more care in culture than the Bush Beans. and should be sown two weeks ltaer. They succeed best in sand loam, which should be liberally enriched with short manure in the hills, which are formed, according to the variety from three to four feet apart. From five to six seeds are planted in each hill, about two inches deep. As the matured bean is used mostly, the season is too short for succession of crops in the North, though it is advantageous to plant succession crops in the Southern states, where the season of growth is often from March to November. Rough cedar or similar poles about seven or eight feet long should be used for Lima Reans to climb on. They should be set in the ground at least eighteen inches, so as to prevent being blown over.

Add .05 per pt.; .07 per qt., each additional quart add .02 if to be sent by mail.

German Black Wax, or Indian Chief. A superb snap bean; pods yellow and stringless. Pt., .20; qt., .35; pk., \$2.00.

We supply all of our BEANS IN PACKETS At 5c each. Postage 3c extra. Our Implements are worth looking over. We extend a cordial invitation to call and examine them. Be sure and ask to see the New Columbia Garden Seeder.

Horticultural or Cranberry. Showy and excellent, either as a snap or shell bean, or for cooking when dry. Pt., .20; qt., .30; pk., \$1.50.

King Horticultural. Pods bright carmine color; both beans and pods are much larger than the common kind. Pt., .20; qt., .30; pk., \$1.75.

Kentucky Wonder. An excellent green podded variety; enormously productive, the long pods hanging in great clusters along the entire vine. Seed dark brown; entirely stringless. Pt., .20; qt., .30; pk., \$1.75

Lazy Wife. One of the best of the later green-podded pole beans for snaps. The pods borne in large clusters, are five to seven inches long, broad, thick, fleshy and entirely stringless. When young they have a rich, buttery flavor, which is retained until they are nearly ripe. The dry bean are excellent for winter use. Seed white. Pt., 20; qt., 30; pk., \$1.75.

Red Cranberry Pole. A popular string or snap bean; very productive with large and tender pod. Pt., .20; qt., .30; pk., \$2.00.

Lima, Early Jersey. One of the earliest. Pt., .20; qt., .35; pk., \$2.25.

BEET

German—Runtel Rube, French,—Betterave. Spanish,—Beteraga.

A rather light soil, well enriched, is best suited to the cultivation of the various beets. The mangels and sugar beets in particular require very liberal manuring. For an early crop of table beets, sow the seed as early as the ground is in condition to work; light frosts will not injure the young plants. For a main crop sow the first of May; and for winter beets, the last of June. Sow in drills, 12 to 15 inches apart, and about one inch deep, pressing the earth firmly upon the seed,—a very important matter. Use about six pounds of seed per acre. Thin out when the plants are large enough. The varieties for table use should be left three or four inches apart.

Crosby's Egyptian. This variety is as early as the original Egyptian, but by careful selection has been made thicker and of better quality. Fkt., .05; oz., .10; !4 lb., .25; lb., .90.

Detroit Dark Red Turnip. An excellent beet for bunching for market; tops exceptionally small and upright; roots turnip shaped with small tap root. Color of skin dark blood red; flesh bright red. Quality is of the best; sweet and tender. One of the best varieties for the market gardener and the home garden. Pkt., .05; oz., .10.; ½ lb., .25; lb., .85.

Dewing's Early. Of deep red color, smooth and of fine form. One of the leading varieties both for market and for family use. Pkt., .05; oz., .10; ½ lb., .25; lb., .85.

Early Eclipse. Very early; dark-red color, small top, and free from fibrous roots. Pkt., .05; oz., .10; 1/4 lb., .25; lb., 85.

Edmand's. This variety is throughly fixed and uniform in type. The flesh is deep blood red in color, and exceedingly sweet and tender. It is round, smooth, of good market size, and does not grow over-large.

Fkt., .05; oz., .10; 1/4 lb., .25; lb., .85.

Long Smooth Blood. A prolific variety; very dark in color; stands drought better than the turnip varieties. Pkt., .05; oz., .10; 1/4 lb., .25; lb., .85.

Dirigo Extra Early. A rich, blood-red beet of fine grain and flavor and is earlier than either the Egyptian or the Eclipse.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .85.

Haskell's Special Blood Turnip. We have a very fine strain of Blood Turnip Beet, of the Edmand's type. Very deep red fleshed so_much in demand in all markets.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .85.

Swiss Chard or Silver Sea Kale. Used as greens and the ribs of leaves cooked and served as asparagus. Pkt., .05; oz., .10; /4 lb., .25; lb., .35.

MANGEL-WURZEL AND SUGAR BEETS

Sow in April or May, using eight to twelve pounds to the acre.

Price of all varieties except the Sludstrup and Eckendorf: Oz., .10; 1/4 lb., .15; lb.,

Mangel Danish Sludstrup

Mangel Danish Sludstrup. Long, Reddish Yellow. Grows well above the ground and easy to pull. More percentage of dry matter than in any known Mangel. Very heavy cropper. Considered by the Danish people the best Mangel in the world.

Price, Ounce, .10; Quarter lb., .20; Pound. .60.

Red Giant Eckendorf. Of cylindrical form and grown mostly above the surface. Has been known to yield as high as 58 tons to the acre.

Price, Ounce, .10; quarter pound, .20; pound, .50.

Lane's White Sugar. One of the best for feeding stock. Very sweet.

Vilmorin's Improved White Sugar. Very sweet, and keeps well. Much relished by

Mangel-Wurzel, Norbiton Giant. A mammoth long-red variety, enormously productive, and keeps well; good for deep soils.

Mangel-Wurzel, Yellow Globe. Does better on shallow soils than the long varieties. An excellent keeper.

BEETS—Continued

Mangel-Wurzel, Golden Tankard. Flesh a deep, rich yellow; very sweet and nutritious, Half long in shape. A very heavy cropper.

Improved Mammoth Long Red. An improvement on the old variety. The roots are very large, uniformly straight and wel formed; proportionately thicker, and are deeper colored than the common stort, and with smaller tops.

BRUSSELS SPROUTS

(Species of Cabbage; cultivation the same)

German,—Rofen-Kohl. French,—Chou de Bruxelles. Spanish.—Berza de Brusels.

One ounce will sow a bed of forty square feet, and produce about 3,000 plants.

This is a delicious vegetable, superior to either borecole or spinach. The small, cabbage-like heads which grow upon the stem are much improved by a moderate frost. Sow in hotbeds in March or April, and in the open ground in May; cultivate same as broccoli.

Dwarf Improved. Produces excellent, compact sprouts; very sure cropper. Pkt., .05; oz., .20; 1/4 lb., .60.

CABBAGE

German,—Kopf-Kohl. French,—Chou Pomme. Spanish,—Berza.

One ounce of seed produces about 3,000 plants.

Early varieties are grown from seed sown in hotbeds in February or March, only moderate bottom heat being required. Transplant into other frames without much, if any, bottom heat, as soon as the plants show the fourth leaf. In April, or as soon as the ground can be easily worked, set out in rows three feet apart, and about eighteen inches between the plants. The ground should be thoroughly stirred with cultivator and hoed every week till the plants cover the ground. For a fall crop, sow in the open ground in May, in hills the proper distance apart, using a liberal quantity of manure in the hill, beside that which is plowed in; thin out to one good plant in each hill. In the same way crops may be sown to lay in for the winter use, planting seed as late as July 1. Seeds can also be sown in shallow drills when the plants are large enough, can be transplanted, setting the plants in rows three feet apart and two feet apart in the row. If the young plants are troubled with the cabbage fly, sprinkle them with tobacco dust, airslaked lime, slugshot or wood ashes, while the dew is on them. To keep off the cabbage worm, sprinkle with Dalmatian insect powder or slugshot.

Danish Ball Head

The wide and unfailing popularity of the Danish Ball Head cabbage is simply wonderful. It seems to adapt itself to all soils and conditions.

The leading characteristics of Danish Ball Head cabbage are: First, that it is a sure header; second, that it is of unapproachable solidity and weight; third, that it is an extra good keeper; and fourth, that it is a good seller.

It is a medium to late cabbage, but is generally grown as a late crop. It is sure to head, the heads being round, hard and extremely heavy, though not extra large. It can be grown in close quarters, on account of its compact habit. Pkt., .05; oz., .25;; ½ lb., .75; lb., ½.50.

All Seasons. An early Drumhead, sure heading, solid variety. Desirable for early or fall use. Pkt., .05; oz., .20; 1/4 lb., .60; lb. \$2.00

Charleston Wakefield. Grows to a much larger size than the Jersey Wakefield. Very productive and a good shipping variety.

productive and a good shipping variety.
Pkt., 05; oz., 25; //4 lb., 75; lb., \$2.50.
Mammoth Rock Red. The largest heading
of any of the red sorts, of deep rich color,
and excellent quality. Pkt., 05; oz., 25;

1/4 lb., .75; lb., \$2.50.
 Sure Head. A fine variety for main crop.
 A good shipper and sure header. Pkt., .05;

oz., .20; ½ lb., .60; lb., \$2.00.

Marblehead Mammoth. The largest heading cabbage of them all. Pkt., .05; oz., .20; ½ lb., .60; lb., \$2.00.

CABBAGE-Continued

Danish Summer Ball Head

Danish Summer Ball Head, extra. The heads of this cabbage are of a splendid shape and ready early in the season. It is very early, very large, very firm and heavy.

Pkt., .05; oz., .30; ½ lb., .90; 1 lb., \$3.00. Danish Roundhead Short-stemmed. This cabbage is recommended as the best ever offered. It embodies all the good qualities which growers ever worked up in cabbage,

is large, hardy and splendid keeper.

Pkt., 05; oz., 25; ½ lb., 75; 1 lb., \$2.50.

Warren's Stone Mason. An improvement
on the Stone Mason Drumhead; heads rounder, firmer and earlier; is an extra good keeper. Pkt., 05; oz., 25; ½ lb., 75; lb., \$2.50.

Savoy Improved American. The finest flavored of all the cabbage family, large and solid. Pkt., .05; oz., .20; ½ lb., .60; lb., \$2.00.

Early Winningstadt. An early variety of excellent quality, not as early as the Wakefield. .Pkt., .05; oz., .20; 1/4 lb., .60; lb., \$2.00.

Henderson's Early Summer. A standard summer variety. We have the true stock. Pkt., .05; oz., .20; 1/4 lb., .60; lb., \$2.00.

Potter's Early Brunswick. An early fall variety well known and popular. Pkt., .05; oz., .20; 1/4 lb., .60; lb., \$2.00.

Early Jersey Wakefield. A standard early variety for home use or market. Pkt., .05; oz., .25; 1/4 lb., .75; lb., \$2.50.

Red Dutch. For pickling or for salads. Pkt., .05; oz., .25; 1/4 lb., .75; lb., \$2.50. Succession. A sure-headed, long-keeping

variety, very similar to All Seasons but maturing a little later. Heads deep and very firm. Pkt., .05; oz., .20; 1/4 lb., .60.

firm. Pkt., .05; oz., .20; ½ lb., .60.
Enkhuizen Glory. A new Holland cabbage which originated at a large seed farm at Enkhuizen, Holland. It is an early cabbage, but still of large size; solid and of the best quality. It is one of the largest early cabbages we have seen, and may be set out as late as the last of July or first of August in this latitude, and will make large, fine heads for late fall or winter use. The great merit of this cabbage lies in the perfect uniformity of its growth. The plants are compact, and have few outside leaves, and can be planted close together, and will produce very large crop. Pkt., .05; oz., .25; ½ lb., .90.

CARROT

German,—Rohre. French,—Carotte. Spanish,—Zanahoria.

One ounce will sow 100 feet of drill; 3 pounds required for an acre.

Carrots require a very finely pulverized so to grow them to perfection. A good, light and well-enriched sandy loam is the best for this crop. For field culture, sow in drills 2½ feet apart, so as to cultivate by horse. Market gardeners sow in drills about 15 inches apart, and cultivate by hand. For early crops cover ½ inch deep, and thin to 6 inches apart in the rows; for late, cover ¾ inch deep, and thin to 4 inches.

Oxheart Carrot
Danvers Haif-Long. One of the heaviest
croppers; roots dark orange color 8 to 10
inches in length, thick, and ending in a
somewhat abrupt point; first class for all

soils. Pkt., 05; oz., 10; ½ lb., 30. Oxheart, or Guerande. Roots short and very thick, and intermediate between Scarlet Horn and Chantenay; color deep orange; fine grained. Pkt., 05; oz., 10; ½ lb., 30.

Large White Belgian. Roots very large and smooth; grown exclusively for stock feeding. Grained.

Pkt., 05; oz., 10; ½ lb., 25. Improved Long Orange. The best known and most largely cultivated of any Carrot; excellent for stock or table use; roots deep orange, 12 to 15 inches long.

Pkt., .05; oz., .20; 1/4 lb., .25.

CAULIFLOWER

German.-Blumenkohl. Spanish, Coliflor. French,-Chou-fleur.

One ounce of seed will produce 1,500 to 2.000 plants if sown in open ground, or about 3,000 in frames.

To raise good Cauliflower there is nothing so essential to success as good seed. The best Cauliflower seed is very expensive, but it is worth to the grower ten times as much as cheap and carelessly grown seeds. The best results are obtained from using Snowball for main late crop, as well as for early use.

Early Cauliflowers are difficult to raise and are not of the best quality but when the plants are set out in July and the heads form in October there is no difficulty in getting fine, large heads of first-class quality. The seed should be sown in open ground or cold frames about the middle of May or first of June, on good soil. When plants are large enough, transplant to rich, moist soil. These remarks refer to Snowball or other early kinds. The late kinds must be sown and transplanted earlier.

Henderson's Early Snowball. This is undoubtedly the finest ever introduced: it is the earliest, and produces beautiful snowwhite heads of the most delicious flavor. The seed we offer is pure and genuine, and Pkt., .20; oz., sure to prove satisfactory. \$2.50.

Extra Selected Dwarf Early Erfurt. The finest strain of the Erfurt Cauliflower: almost as early as the Snowball; grows about 15 inches high producing very solid, pure white heads of the very finest quality; seldom fails to form a good-sized head.. Pkt., .15; oz., \$2.00.

Danish Giant (Dry Weather). This superior strain originated in Denmark. It is about two weeks later than our Snowball; makes a larger head and is very resisting against unfavorable season and dry weather. We would suggest to our customers who have had trouble in raising other kinds of Cauliflower to give this variety a trial, as to our minds the chances of success, with this Cauliflower is increased many fold over any other

Pkt., .20; oz., \$2.50,

All kinds of Insecticides, Spray Pumps, Fower Sprayers, etc., always on hand. Call and examine or write for catalogue and prices.

CELERY

German,--Sellerie. French.—Celeri. Spanish,-Apio.

One ounce of seed produces about 3,000 plants.

Sow seed the first or second week in April in hotbed or cold frame. As soon as the plants have attained a height of three inches, transplant, setting them four inches apart. As fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. Some of the varieties, such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board 12 to 15 inches wide on edge on each side of the row.

Boston Market. The best and most popu-

lar sort in cultivation.

Pkt., .05; oz., .30; 1/4 lb., .75. Giant Pascal. A strong grower and wonderful keeper; quality very fine.

Pkt., .05; oz., .20; 1/4 lb., .50. Golden Self-Blanching. A self-blanching early golden-colored variety that is very pop-Pkt., .05; oz., .40; 1/4 lb., \$1.50.

White Plume. A variety that can be more easily grown than any other as it does not require high banking to blanch the stalks. Simply earthing up enough to keep the stalks together or by passing a string around each plant is sufficient.

Pkt., .05; oz., .25; 1/4 lb., .75. Celeriac, or Turnip-rooted. The turnipshaped roots of this variety are cooked and sliced and used with vinegar, making a most excellent salad.

Pkt., .05; oz., .15; 1/4 lb., .50.

CHICORY

One ounce is sufficient for a bed of four square yards.

Large-rooted or Coffee. Leaves when blanched make an excellent salad. Pkt., .05; oz., .10; 1/4 lb., .30.

CORN—Sugar

French,-Mais. German,-Welfchkorn Spanish,-Maiz.

One quart will plant 200 hills; 1 pk. will plant 1 acre in hills.

Corn requires a good soil and a warm situation. Commence for first early by planting the early varieties about May 1, and if a continuous supply is wanted all summer, make plantings about two weeks apart from May 1 until the last of July, first planting early varieties then later ones. Plant in rows 3 feet apart, and make the hills about the same distance apart in the rows. Five kernels in the hills are plenty. Cover about 1 inch deep for early and a little deeper for late. Thin to 3 plants in a hill. Add 5c per pt; 7c per qt., and for each additional quart to the same address add 2c, if to be sent by mail.

CORN-Continued

Early Red Cory. This variety is the favorite for first early.

Pkt., 05; pt., 15; qt., 25; pk., \$1.50. White Cob Cory. This is an improvement over the Early Cory as the cob is white which gives it a finer appearance. It is as early as the Early Cory and of excellent quality. Pkt., 05; pt., 15; qt., 25; pk., \$1.50.

Crosby's Early. An early corn of large size and choice quality. It has long been a standard variety.

Pkt., 05; pt., 15; qt., 25; pk., \$1.50. Stowell's Evergreen. The best late corn for all purposes. It has been a leader for many years as a main crop variety and is unexcelled as a market corn.

Pkt., .05; pt., .15; qt., .25; pk., \$1.50 Country Gentleman. This is the finest of the medium late varieties. The rows are zlg-zag with long slender kernel of delicious flavor.

Pkt., 05; pt., 15; qt., 25; pk., \$1.50. Black Mexican. This corn when in condition for the table cooks remarkably white; but the ripe grain is black or bluish-black. It is surpassed by none in tenderness.

Fkt., 05; pt., 15; qt., 25; pk., \$1.50. Golden Bantam. The fact that the grains of this variety are yellow is an indication of hardiness and its value for early planting and early maturity. It is a rapid grower, and produces ears measuring about 5 inches, but the smallness of ears is fully made up by

Stowell's Evergreen

the deliciously sweet flavor and tender quality of the corn when cooked. It is a fine variety for the home garden.

Pkt., .05; pt., .15; qt., .25; pk., \$1.75.

FIELD AND FODDER CORN

Prices will be quoted on application on the following corns Please give the amount desired as well as the kind in all cases.

Southern White. A white variety that no silo owner or dairy farmer should overlook. It grows 12 to 16 feet high; has broad foliage and tender stocks. There is no better fodder to keep up the flow of milk during hot weather when the grass is burned up. Heavy cropper.

Leaming. An early very heavy long-eared corn. Grows to medium height with large amount of foliage. One of the best ensilage corns, very much relished by stock. Cob red; grain yellow.

Red Cob. A very large-growing white dent corn, with red cob. Fodder sweet, juicy and tender. Very popular in northern dairy districts.

Sanford. A well-known variety, adapted to the whole of New England. Kernels silvery white fint color; large and broad. An excellent fodder and ensilage corn.

Early Canada. An eight-rowed, yellow-flint variety with small cob and deep grain. This is one of the earliest and best and seldom fails to produce a crop. The Early Canada seed we have to offer was grown in this State. From the fact that this corn matured in good shape last season it is sufficient evidence that it is Early and well adapted to this climate.

Longfellow. An eight-rowed, yellow flint sort; ears average 10 to 15 inches. Large kernels and small cob. Particularly adapted to New England.

Haskell's Prizetaker Corn

CORN—Continued

HASKELL'S PRIZETAKER CORN

This corn has fully maintained its past record as being the very best flint corn grown.

This corn showed a test of 12.2 per cent. protein, 5.51 fat, and 78.56 carbo-hydrates. which makes it the highest test corn from a food value of any of the known flints or dents.

On a recent test of this corn, 70 pounds of ears made 63 pounds of shelled corn.

This also makes an exceptionally fine corn for an ensilage corn as it grows when planted for ensilage very rank, being 10 to 12 feet tall, and the stalks are very fine grain, making a much more profitable corn for ensilage than any of the dent varieties. We have this corn both on the cob and shelled

CHERVIL

One ounce will sow about 300 feet of drill. Cultivated like parsley. Sow thickly in May, in drills half an inch deep, one foot apart. Use while the leaves are young and tender.

Curled Chervil. The young leaves are used for garnishing, and flavoring soups.

Pkt., .05; oz., .10; 1/4 lb., .25.

CORN SALAD OR FETTICUS

German.--- Uckerfalat. French.-Mache. Spanish,-Macha Valeranilla.

One ounce will sow 150 feet of drill. Sow in September, in drills eight inches apart, covering the seeds lightly, and protect from frost by a light covering of hay or litter. The seed may also be sown in spring.

Large Green Cabbaging. A small, hardy salad; used also as a substitute for lettuce; can be sown in September, and wintered over same as spinach.

Pkt., .05; oz., .10; 1/4 lb., .30.

CRESS OR PEPPERGRASS

French.—Cresson. German.—Areffe. Spanish,-Masuerzo.

One ounce will sow 16 square feet, or 150 feet of drill.

A popular salad, which should be sown early in the spring-very thickly in shallow drills-and at short intervals, for success, as it soon runs to seed.

Extra Curled. A small plant, having a fine, pungent flavor, and used as a salad; may be cut two or three times.

Pkt., .05; oz., .10; 1/4 lb., .20; lb., .50.

True Water Cress. Grows along the banks of ponds and streams, and is easily introduced, wholly unlike Extra Curled; leaves are quite large and thick; a fine salad, sold in immense quantities in the large markets in spring.

Pkt., .05; oz., .40; 1/4 lb., \$1.25.

CUCUMBER

German,-Gurfe. French.-Concombre. Spanish.-Pepino.

One ounce will plant 50 hills; 2 pounds will plant an acre.

Culture-For earliest use, sow the seed in the hotbed or greenhouse in February or March, in warm loam, where the temperature is about 90 degrees; cover half an inch deep, and when the plants are of fair size transplant into hills (made in the greenhouse), four plants in a hill, so that when the weather permits the whole hill can be moved to the open ground by means of tins made for that purpose. Plant for general use in the open ground about June 1, in hills 6 feet each way, and thin to three plants in a hill. Fine old manure (about six cords per acre) is sufficient; or, better still, plant on land from which a crop has been taken, and which was heavily manured for that crop.

CUCUMBER-Continued

Davis Perfect. As now selected, this popular new variety is well worthy of praise. The long, even fruits are of fine form, with an intensely dark rich green skin. With very few seeds the solid white flesh is of superb quality for slicing. So handsome and regular are the fruits that they bring an extra price on market,—often being taken for "hothouse grown." The vines are of strong growth and quite prolific.

Pkt., .05; oz., .10; 1/4 lb., .35.

Extra Early Russian. Earliest vari ty known, hardy and productive, fruit very small and quality fine for pickling or slicing.

Pkt., .05; oz., .10; 1/4 lb., .35.

Early Cluster. Fruit borne in pairs; light green, a great bearer.

Pkt., .05; oz., .10; 1/4 lb., .35.

Early Frame or Short Green. An excellent sort, both for table use and for pickling. Plants very vigorous and productive. Fruit straight, a little smaller at the ends, bright green, lighter at the blossom end. Comes into use a little later than the Early Cluster and keeps green a long time. Our stock is very superior.

Pkt., .05; oz., .10; 1/4 lb., .35.

Boston Pickling. Fruit short, smooth and pointed at each end, bright green and a great yielder, one of the best pickling.

Pkt., .05; oz., .10; 1/4 lb., .35.

White Spine Improved. The most popular strain of White Spine, and for general out-door culture the best.

Pkt., .05; oz., .10; 1/4 lb., .35.

Long Green Improved. Fine for pickling when small, good for table use when about half grown.

Pkt., .05; oz., .10; 1/4 lb., .35.

Japanese Climbing. Vines are extra strong and foliage much more vigorous than other kinds, and being a climbing sort, can be grown on trellises, etc., saving much valuable space in small gardens. It is very prolific, from forty to fitty cucumbers having been counted on single plants. Fruit cylindrical, about ten inches long, thick and of fine flavor.

Pkt., .05; oz., .15; 1/4 lb., .50.

DANDELION

German,—Lowenzahn. French,—Pissenlit. Spanish,—Amargon.

One ounce will sow 100 feet of drill. The Dandelion resembles endive, and affords one of the earliest as well as one of the most healthful of spring greens. Sow as early as the weather will permit, in good, well-enriched soil, in rows 12 inches apart, covering seed ½ of an inch deep, and firming the soil well over them. Thin to two or three inches apart in the rows; by so doing the roots will be larger and a great amount of time will be saved the

White Spine Cucumber

DANDELION-Continued

next spring in trimming or gathering the crop. One pound per acre is sufficient.

Improved Thick-Leaved. Cultivated for spring greens; an immense improvement on the common Dandelion, both in size and thickness of its leaves and fine flavor, being far less bitter.

Pkt., .05; oz., .50; 1/4 lb., \$1.75.

EGGPLANT

German,--Gierpanze. French,--Aubergine. Spanish,--Berengena.

The Eggplant will thrive well in any good garden soil, but will repay good treatment. The seeds should be sown in hotbed or warm greenhouse in March or April, and when about an inch high potted in two-inch pots. Plant out about June 1, two and one-half feet apart.

New York Improved Purple. The leading market variety, and undoubtedly the best for size, quality and productiveness.

Pkt., .05; oz., .50; 1/4 lb., \$1.50.

ENDIVE

German,—Gendive. French,—Chicoree. Spanish,—Endivia.

One of the most refreshing and attractive of all autumn and winter salads. Sow seed from the middle of June until the end of August.

Green Curled. Beautifully curled, tender, and crisp.

Pkt., .05; oz., .15; 1/4 lb., .50.

Moss Curled. More finely curled, and a heavier and more dense plant than Green Curled.

Pkt., .05; oz., .15; 1/4 lb., .50.

Broad-leaved Batavian (Escarolle). This variety is chiefly used in soups and stews; requires to be tied up in blanching.

Pkt., .05; oz., .15; 1/4 lb., .50.

KALE OR BORECOLE

German,—Blatter-Kohl. French,—Chou Vert. Spanish,—Breton.

One ounce will produce 3,000 plants.

Sow from the middle of April to the beginning of May in prepared beds; transplant in June, and treat in the same manner as for cabbage. Of all the cabbage tribe this is the most tender and delicate. The varieties are all extremely hardy, and are best when touched by frost.

Dwarf German Purple, or Brown Curled. Esteemed by Germans; very hardy and of fine quality; so handsome that it is frequently grown for ornament.

Pkt., .05; oz., .10; ½ lb., .30.
Dwarf Green Curled Scotch. Rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter; leaves beautifully curled and bright green.

Pkt., .05; oz., .10; 1/4 lb., .30.

Tall Green Curled Scotch. Grows about two feet high; leaves dark green, curled and wrinkled; very hardy, and is improved by a light frost.

Pkt., .05; oz., .10; 1/4 lb., .30.

KOHL RABI

German,—Rohl- Rab. Frencn,—Chou-Rave. Spanish,—Col de nabo.

One ounce will sow 200 feet of drill. This vegetable, the popularity of which is rapidly increasing, combines the virtues of the turnip and cabbage, but excels both in nutritive, hardy and productive qualities. The seed may be sown in June in rows 18 inches apart, and the plants thinned out to eight or ten inches in the rows.

KOHL RABI—Continued

Early White Vienna. Best for general table use; flesh tender and white.

Pkt., .05; oz., .25; ½ lb., .60. Furple Vienna. A little later than the White; color bluish purple.

Pkt., .05; oz., .25; ½ lb., .60.

Large Green or White. Good for table and also for feeding stock.

Pkt., .05; oz., .25; 1/4 lb., .60.

LEEK

German,—Lanch. French,—Poireau. Spanish,—Puerro.

One ounce will plant 200 feet of drill.

The leek is very hardy and easily cultivated; it succeeds best in a light but well-enriched soil. Sow as early in the spring as practicable in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible, that the neck, being covered, may be blanched.

London Flag. Very popular with market gardeners.

Pkt., .05; oz., .15; ½ lb., .50. Broad American Flag. Large and superior to London Flag; popular with gardeners.

Pkt., .05; oz., .10; 1/4 lb., 50.

LETTUCE

German,—Lattich. French,—Laitue. Spanish,—Lechuga. One ounce will sow 100 square feet, or 120

feet of drill

Requires a rich, moist soil, and to be crisp
and tender needs to be grown in cool weather. For winter use, sow in hotbeds every two
weeks, at the rate of one ounce of seed to
four sashes (a sash is three feet long by six
feet wide); cover very lightly, and transplant, first to three inches apart each way,
afterward to eight inches. For garden or
field, sow in rows, and cover, one-fourth of
an inch deep, and thin out to twelve inches
apart in the rows. For New England the
White Seeded Tennisball for cultivation under glass, and the Black Seeded Tennisball
for outdoor use, are the standard variety.

May King. Probably the finest all-seasons lettuce yet introduced. It is very early and

hardy, and will stand cold, damp weather better than many varieties. Planted out of doors or under glass it will produce fine solid heads much sooner than any other variety. Outer leaves are yellowish green, tinged with brown, while the inside is a rich yellow.

Pkt., .05; oz., .25; 1/4 lb., .75; lb., \$2.00.

Big Boston. A most desirable variety, either for forcing in cold frames or open-ground planting; always produces large, solid, saleable ends. Pkt., .05; oz., .20; 1/4 lb., .60.

Boston Curled. Of ordinary quality but great beauty; highly ornamental in growth, with its frilled leaves.

Pkt., .05; oz., .20; 1/4 lb., .50.

Prize-Head Early. Leaves green and red, very thin, crisp and tender; one of the best for private use.

Pkt., .05; oz., .20; ½ lb., .50.
Tennisball Black-Seeded. A very popular sort for open-ground culture; forms a handsome head, and is crisp and tender.

Pkt., .05; oz., .20; 1/4 lb., .50.

Tennisball, White-Seeded. Extensively grown for forcing and heading under glass; heads firm and good size, very white and crisp. Pkt., .05; oz., .15; ½ lb., 40.

Simpson Black-Seeded. Nearly double the size of the Early Curled Simpson; leaves delicate golden yellow; superior variety for forcing or sowing out of doors.

Pkt., .05; oz., .15; ½ lb., .30.
Simpson Early Curled (White Seed.) A leading early sort for forcing or open ground.

Pkt., 05; oz., .15; ½ lb., 30. Tomhannock. A variety with upright leaves, beautifully wrinkled; edges of outer leaves have reddish tinge; one of the best.

ly tinged with red.

Pkt., .05; oz., .15; ½ lb., .30.
Boston Market. One of the best for forcing under glass, as well as for outside use; forms fair-sized heads, edge of leaves slight-

Pkt., .05; oz., .20; 1/4 lb., .50.

May King

There is a breezy farm paper named the "Furrow" which we want in your home. Send your name for our mailing list and four times a year it will be sent you FREE.

LETTUCE-Continued

Grand Rapids. An excellent forcing variety with loose heads and of good size and form. Fkt., .05; oz., .15; 1/4 lb., .40.

Brown Dutch. Leaves large, thick, green, tinged with brown; forms large, solid heads; exceedingly hardy.

Pkt., .05; oz., .15; ½ lb., .50. Hanson. Large, solid heads; tender, crisp,

and of a fine flavor.

Pkt., .05; oz., .15; 1/4 lb., .40.

White Paris Cos. Has long, narrow, upright leaves; does not head, but when tied up blanches very nicely.

Pkt., .05; oz., .15; 1/4 lb., .40.

MELON, MUSK

German,—Melone. French,—Melon. Spanish,—Melon.

One ounce will plant about 50 hills; 2 to 3 lbs. in hills per acre.

Melons thrive best in a light, rich soil. Plant early in May, when the ground has become warm and dry, in hills six feet apart each way for Muskmelons, eight feet for Watermelons. Previous to sowing the seed, mix a few shovelfuls of well-rotted manure in each hill, and plant in each twelve to fifteen seeds; after all danger of bugs is over, thin out to three plants per hill. When about one foot long, pinch off the tips to make them branch, as it strengthens the growth of the vines and makes the fruit mature earlier. Give plenty of water, and feed liquid manure occasionally. A few hills for early use may be had by sowing on pieces of sod in a hotbed, and when warm enough transplant to open ground.

Emerald Gem Meion. The Emerald Gem is entirely unlike any other muskmelon yet introduced. The meions are about the size of the Netted Gem, but unlike that variety, the skin, while ribbed, is perfectly smooth, and of a very deep emerald green color. The flesh, which is thicker than any other native meion of the same size, is of a suffused salmon color, and ripens thoroughly to the thin green rind, which is distinctly defined. The flesh is peculiarly crystalline in appearance, and so very juicy, sweet and rich that it almost drops to pieces. It matures very early, and is quite productive.

Fkt., .05; oz., .10; 1/4 lb., .50; lb., \$1.50.

Rocky Ford. This new Muskmelon is simillar to the oval strain of Netted Gem. The strain here offered originated with the melon growers in the vicinity of Rocky Ford, Col., who have shipped this melon from that distant Western point to Eastern markets. The melons grown by them are so fine in quality as to outsell all others, and the demand for such melons has been far beyond the supply. Pkt., 05; oz., 10; 1/2 ib., 40; lb., \$1.25.

Long Yellow Musk. A long, large melon of peculiar musky flavor; a rich, yellow color both inside and out.

Pkt., .05; oz., .10; 1/4 lb., .40; lb., \$1.25.

Early Hackensack. An improvement over the old Hackensack, producing melons of as good quality and ten days earlier. Large fruit, with thick, green flesh of the finest flavor.

Pkt., .05; oz., .10; 1/4 lb., .40; lb., \$1.25.

MELON, WATER

German,—Waffermelone. French,—Melon. d'Eau. Spanish,—Zandia.

One ounce will plant 50 hills.

Prices on all varieties of Watermelons as follows: .05 per pkt.; .10 per oz., $\frac{1}{4}$ lb., .25; lb., .75.

Citron for Preserves. The old and well-known Preserving Citron; seeds red.

New Florida Favorite. An improvement on the old Florida Favorite, growing to double the size and more prolific. Its perfect shape, bright red crisp flesh, and delicious flavor, make it one of the best melons grown.

MELONS-Continued

Phinney's Early. This is another very early melon, earlier than the preceding; it is hardy and a sure cropper and extensively cultivated in the North.

Peerless or Ice Cream. Very early, flesh firm and sugary.

Cuban Queen. Very productive; flesh bright red, very solid, crispy and sugary.

MUSTARD

German,—Senf. French,—Moutarde.
 Spanish,—Mostaza.

One ounce will sow 75 feet of drill.

As an ingredient, the green Mustard imparts a delightfully pungent flavor to the various forms of prepared salads. For early crops the seed may be sown in a hotbed in March, and for general crop at frequent intervals through the spring, in drills from eight to twelve inches apart.

White London. Considered the best for salads and spinach; leaves light green. It is best when about four inches high.

Pkt., .05; oz., .10; ½ lb., .15. Brown or Black. Pkt., .05; oz., 10; ½ lb., .15.

OKRA OR GUMBO

German,—Ocher. French,—Gombo. Spanish,—Cebolla.

One ounce will plant 100 hills.

This is an annual from the West Indies, cultivated for its green seed-pods, which are used in soups or stewed and served like asparagus. It is highly esteemed in the South for making gumbo soup. The pods when young and tender should be sliced in sections, strung on a thread and hung up in the shade to cure like dried apples; can be used for soup at any time.

Culture. Sow the seed thinly in dry, warm soil, in shallow drills two feet apart. After the plants are up, thin them out to nine inches apart; hoe frequently and draw a little earth to the stems as they grow. Gather the pods when quite green and about one and one-half inches long.

Long Green. Pods long, green and ribbed, and a heavy bearer. Pkt., .05; oz., .10; 1/4 lb., .25.

White Velvet. Great improvement over the older varieties; pods larger, white, smooth, and a more abundant bearer; of superior quality... Pkt., .05; oz., .10; ½ lb., .30.

Weeders, Seeders and Garden Tools for the Market Gardeners are Specialties with us. Call and examine same.

ONION

Select the clean, richest land on the farm for the Onion crop. If Onions were grown on the land the previous year, so much the better but any good corn or potato land will do. Broadcast fifteen to twenty cords of fine well-rotted manure to the acre and plow not deeper than six inches; harrow thoroughly, cross plow, and harrow again, after which, hand rake with wood rake and remove stones and rubbish. Sow four to five pounds of seed per acre in drills twelve to fourteen inches apart and about one-half inch deep. See that the Seed Drill is equipped with a good roller, that will press the earth firmly upon the seed. Sow as early in the spring as the ground can be properly worked. There is seldom necessity for thinning Onions if the land has been properly manured and seeded. After the Onions are three to four inches high, an application of about five hundred pounds to the acre of fertilizer, rich in available nitrogen, strewn between the rows, will be very beneficial. Keep the Onions growing by never allowing the weeds to get ahead and the acre should produce, in a good average season, five hundred to seven hundred bushels. When the tops are down, the Onions may be pulled and left on the ground, and should be frequently turned with a wooden rake, until tops are dried.

Yellow Globe Danvers. Undoubtedly the best known and most popular of all onions; the earliest yellow variety; is entirely free from stiff necks. Globular in shape; has a small top. It is the most productive, producing as high as one thousand bushels per acre, and will average on good soil with proper We buy our ONION SETS from the largest grower in the country and know that we have as fine a lot as can be obtained.

ONION-Continued

culture, five to seven hundred bushels.

Fkt., 05; oz., 20; ½ lb., 60; lb., \$2.00. Yellow Globe Danvers, our Finest Strain. This is the product of years of careful selection, and is the most perfect type of the Yellow Globe Danvers Onion which intelligent, painstaking care can produce. It is immeasurably superior to the average seed offered, not only in shape and color, but in productiveness. Pkt., .05; oz., .25; ½ lb., .75; lb., \$2.50.

Large Red Wethersfield. We have a very fine and select strain of this sort. Color is deep purplish red, flesh white, moderately grained and very firm. Yields enormously and is one of the best winter keeping onions. Pkt., 05; oz., 25; ½ lb., .75; lb., \$2.50.

White Portugal, or Silverskin. A large flat, white onion of mild and pleasant flavor; hard and fine-grained, and a good keeper. Extensively sown for sets, and is also largely grown for pickling. Pkt., .05; oz., .25; ½ lb., .75; lb., \$2.50.

Southport Red Globe. The onions from Southport, Conn., generally command an extra price in New York markets, because of their beautiful shape and color, due partly to the variety grown and partly to the favorable soil and the extra care taken in handling the crop. Pkt., .05; oz., .25; 1/4 lb., .75; lb., \$2.50.

Prize-Taker. A Globe-shaped variety of delicate straw color, growing to a very large size. It ripens up hard and firm, the flesh being pure white, fine grained and of mild, delicate flavor. Pkt., .05; oz., .25; 1/4 lb., .75; lb., \$2.50.

ONION SETS

| Potato Onion Sets | qt., | .25; | pk., | \$1.25 |
|--------------------|------|------|------|--------|
| Red Bottom Sets | qt., | .25; | pk., | \$1.25 |
| White Bottom Sets | qt., | .25; | pk., | \$1.25 |
| Yellow Bottom Sets | qt., | .25; | pk., | \$1.25 |
| Top Sets | at | .20: | nk | \$1.00 |

Onion Sets should be planted as early in the spring as convenient to obtain early green onions, but they may be set at any time up to June 1. Set in rows a foot apart, and three to four inches between them in the row. Any good soil will suit them. When grown in quantities, high cultivation is given in order to forward the crop for an early market. They are ready for use as soon as the bulbs begin to be of fair size. Those not used in green condition will ripen early in July and make nice onions. Potato and Top Onions are grown from bulbs only.

PARSLEY

German,—Peterfile. French,—Persil. Spanish,—Perejil.

One ounce for 150 feet of drill.

Parsley succeeds best in rich, mellow soil. As the seed germinates very slowly, it should be sown early in spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart and half an inch deep.

Champion Moss Curled. The standard variety. Pkt., .05; oz., .10; $\frac{1}{4}$ lb., .25; lb., .75,

Extra Curled Dwarf. Leaves finely cut, very early and bright green; desirable for either the home or market garden. Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

PARSNIP

German,—Pastinake. French,—Panais.
Spanish.—Pastinaca.

One quart for 75 feet of drill; one to two bushels in drills for an acre.

Sow as early in spring as the weather will admit drills fifteen inches apart, covering half an inch deep. When well up thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in fall a certain quantity for winter use, leaving the rest in the ground till spring, to be dug as required.

Prices on all varieties of parsnips as follows: Pkt., .05; oz., .10; 1/4 lb., .20; prices in

quantity on application.

Abbott's Improved. Hollow Crown. Smooth and quite large; fine sort.

Guernsey. Roots not quite so long as Hollow Crown, but of greater diameter and more easily gathered.

PEAS

German,—Erbren. French,—Pois. Spanish,—Guizante.

One quart for 75 feet of drill; one to two bushels in drills for an acre.

Peas come earliest to maturity in light, rich soil. For general crop, a deep loam or a soil strongly inclining to clay is best. For early crops decomposed leaves or leaf-mold should be used; or, if the soil is very poor, strong manure may be used. For general crops a good dressing should be applied, and for the dwarf-growing kinds the soil can hardly be too rich. When grown as a market crop, peas are never staked; for private use, they are generally sown in double rows, and the tall varieties staked up by brush. For an early crop sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. After the first of June sowing should be discontinued until the middle of August, when a good crop may sometimes be secured by sowing an extra-early sort for fall use.

If sent by mail add .05 per pt.; .07 per qt., and for each additional qt. to same address add .02.

All marked thus (*) indicate wrinkled varieties.

Extra Early Dwarf Varieties

*Bliss American Wonder. An old variety, but still highly prized for its flavor and quality. Of dwarf, robust habit, growing twelve to fifteen inches in height, and bearing an abundance of good-sized, well-filled pods.

Pt., .15; qt., 25; pk., \$1.75.

*Sutton's Excelsior. Ripens early on vines fourteen to sixteen inches high, covered with a great abundance of long, straight, broad pods of a pale-green color. Price: Pt., .15; qt., .30; pk., \$2.25.

*Premium Gem. A fine-flavored dwarf, wrinkled variety; height, eighteen inches. Pt., .15; qt., 25; pk., \$1.75.

*Nott's Excelsior. This is the earliest dwarf wrinkle pea. The plant is dwarf and needs no support. The pods are of good size and well filled with large peas of the finest quality. It is as early as the American Wonder, while the vines are much more productive and the pods of larger size. There is no better early dwarf pea. Fifteen inches.

Pt., .15; qt., 25; pk., \$1.75.

Every person planting peas should have one of our Garden Seeders. Send for descriptive circular and prices, or if possible call at our store and examine them.

Sutton's Excelsion

Extra Early Varieties Not Dwarf

Alaska. An extra early round pea bearing pods of a dark green color; two feet.

Pt., .15; qt., 25; pk., \$1.75.

*Gradus, or Prosperity. No new variety of peas has ever met with the favor and sale as the "Gradus" has since its introduction in America several years ago. It combines the finest quality with extreme earliness, and is also productive, bearing pods fully as large as Telephone. The color of the shelled peas is a beautiful light green, which color they retain after being cooked; the quality and flavor are delicious, and the peas remain tender and sweet for a long time.

Pt., .15; qt., .30; pk., \$2.25.

*Thomas Laxton. One of the very best of the tall growing large pod early peas. The plant is a very hardy and strong grower, producing extra large size pods in abundance. The quality is delicious, and cannot be surpassed by any other variety. The "Thomas Laxton" will mature nearly as early as any of the extra early smooth peas, and being a wrinkled sort is much sweeter.

Pt., .15; qt., .30; pk., \$2.25.

Thomas Laxton PEAS--Continued

Second Early Varieties

*Heroine. One of the very best late kinds. Very long pods well filled with deliciously sweet dark green peas. Two feet. Pt., .15; qt., 25; pk., \$1.75.

*Telephone. A pea of the finest quality, sweet and delicious. Medium late, growing four feet tall with pods of the largest size. Pt., .15; qt., 25; pk., \$1.75.

*Yorkshire Hero. Bears large, well filled pods on stocky, vigorous vines. A first-class late pea. Two feet.

Pt, .15; qt., .25; pk., \$1.60.

*Bliss Everbearing, Medium late and very productive. Two feet tall.

Pt, .15; qt., .25; pk., \$1.60.

*Haskell's Dark Green Pod Peas, Immense pods of the style of the Telephone. A very superior wrinkled pea of quick and robust habit of growth. Pods are very deep green, averaging five to six inches in length and are borne in great abundance. The peas have a peculiarly pleasing flavor sure to satisfy all lovers of this most delicious vegetable. Haskell's Dark Green Pod is a medium late variety growing from three and one-half to four feet in height.

Pt., .15; qt., .30; pk., \$1.75.

*Duke of Albany or American Champion. Very fine, large pods and peas of finest quality. Medium late three feet.

Pt., .15; qt., .30; pk., \$2.00.

*Dwarf Champion. Possesses all the merits of the reliable Champion of England. A hardy robust grower producing dark green pods of good size and in great abundance. Quality excellent.

Pt., .15; qt., .25; pk., \$1.65.

*Dwarf Telephone. (Carter's Daisy). Similar to the Tall Telephone except in the height of the vine, which is only about two feet.

Pt., .15; qt., .30; pk., \$1.75.

*Admiral Dewey. An enormous cropper; peas very large and sweet.

Pt., .15; qt., .30; pk., \$2.00.

Late Varieties for General Crop.

*Champion of England. The standard for quality. Grows four feet tall, very prolific, and still one of the best late peas.

Pt., .15; qt., .25; pk., \$1.60.

*Improved Stratagem. A very large, fine pea growing about twenty inches tall, strong and stocky. Late.

Pt., .15; qt., .30; pk., \$2.00.

Mammoth Melting Sugar. (Edible pods.) Large broad pods, very brittle and entirely stringless. Height four feet.

Pt., .25; qt., .50.

White Marrowfat. A good late sort. Cultivated very extensively for the summer crop. Ft., .10; qt., .15; pk., \$1.15.

Black-Eved Marrowfat. An old and standard late variety for garden or field use.

Pt., .10; qt., .15; pk., \$1.15.

Canada Field. Seeds small, white; for field culture only; largely used for sowing among oats.

PEPPER

German,-Pfeffer. French.-Piment. Spanish.-Pimiento.

One ounce will produce 2,000 plants. Grown largely for pickles. Sow in hotbeds early in April, and transplant to the open ground when the weather is favorable. They should be planted in warm mellow soil in rows 18 inches apart. They may also be sown in the open ground when danger of frost is past.

Large Bell, or Bull Nose. A favorite and well-known pickling sort; is early, large, Pkt., .05; oz., 25, mild and thick skinned.

Long Red Cayenne. A small, long, bright red sort, very productive; extremely strong Pkt., .05; oz., .85. and pungent.

We will have a fine assortment of SEED POTATOES

In many of the common storts and all are from selected stock. Ask for quotations.

POTATOES

While there are many varieties of potatoes which claim the public favor, we have included in our stock only a few and these we know to be the best in cultivation. All our potatoes are grown from selected stock in Maine and being of a uniform size are calculated to give the best results when used in a planter. Write for prices and descriptions on

Green Mountain, Norcross,
Irish Cobbler, Early Rose and
Gold Coin, Early Six Weeks,
Early Harvest, Sir Walter Raleigh.

PUMPKIN

German,—Kurbis, French,—Poitron. Spanish,—Calabaza.

One ounce will plant 20 hills.

Pumpkins are grown chiefly as food for stock. The usual method of planting is to scatter a few seeds at intervals in the hills when planting Indian corn; in this way good

crops of Pumpkins are secured with slight labor and expense, and make a valuable addition to the season's crops.

Connecticut Field. The common yellow pumpkin, grown chiefly for feeding stock.

Oz., .05; 1/4 lb., .15; lb., .40.

Large Cheese or Kentucky Field. A most popular variety. Fruit flattened, the diameter being two or three times more than the length. Oz., .05; ½ lb., .10; lb., .40.

Sweet or Sugar. A small variety, finegrained and sweet; the best for table use. Oz., .05; 1/4 lb., .20; lb., .60.

RADISH

German,—Rettig, Rabies. Spanish,—Rabano. French,—Radis, Rave, Petite Rave.

One ounce will sow 100 feet of drill. Culture. The soil for Radishes should be very rich, light and mellow, well broken by digging as their tender and mild qualities depend much upon their rapid growth. For very early use sow in hotbeds in February and March and in the open air as soon as the ground can be worked, at intervals of ten or twelve days for a succession as long as they may be wanted. The winter varieties should be sown in August, lifted before severe frost, and stored in the cellar.

Vick's Scarlet Globe Radish. A leader among bright round Red Radishes. Quick maturing, extremely attractive, short tops, solid and fine flavor.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

Early Scarlet Turnip, White Tipped. One of the handsomest of the turnip radishes and a great favorite in many large markets for early planting outdoors. It is but little later than the White Tipped Forcing, and will give entire satisfaction where extreme earliness is not the primary object. Roots slightly flattened on the under side; color, very deep scarlet with a white tip; flesh white and of the best quality.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

Long Scarlet. Short top. The standard variety of the long sorts, used either for forcing or open culture; six or seven inches long.

Pkt., .05; oz., .10; 1/4 lb., .20; lb., .50.

Chartier. Decidedly distinct in appearance from any radish in cultivation. The color at the top being crimson, running into pink about the middle, and from thence downward it is a pure waxy white. It will attain a very large size before it becomes unfit for the table.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

RADISH-Continued

French Breakfast, Olive-shaped scarlet, with white tip; crisp and tender. Very early. A general favorite.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

Early Scarlet Turnip. A well known and popular variety. Small top of quick growth, mild and crisp.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

Non Plus Ultra. One of the earliest forcing radishes, being ready for the table in three weeks from planting. Roots round and bright scarlet, crisp and delicate.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

China Rose. Bright rose-colored skin; flesh white and quality excellent; one of the best for fall and winter use.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

Long White Vienna. Of rapid growth and beautiful shape; skin and flesh snow-white. The finest of long white radishes.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

Long Black Spanish. Long, black, flesh white and slightly pungent; one of the latest and hardiest.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

Round Black Spanish. Skin black; white fleshed and piquant flavor.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75.

SALSIFY OR OYSTER PLANT

German,-Bocksbart. French.-Salsifis. Spanish,-Ostra vegetal.

One ounce will sow 50 feet of drill. Culture. Sow the seed in light deep soil, early in the spring, in drills twelve inches apart and one inch deep, thinning out the

young plants to four or five inches. The roots will be ready for use in October, when a supply should be taken up and stored, like carrots. Those remaining will suffer no injury by being left in the ground till spring but should be dug up before commencing their growth.

Mammoth Sandwich Island. We consider this the largest and most profitable salsify in cultivation; roots are two to three times the size of the ordinary salsify and of more agreeable flavor. It is pure white in color and invaluable to market gardeners.

Pkt., .05; oz., .20; 1/4 lb., .50.

SPINACH

German,-Spinat. French.-Espinard. Spanish,-Espinaca.

One ounce for 100 feet of drill: 10 to 12 pounds in drills for an acre.

This is a very important crop in our market gardens, and is one of the most easily managed of all vegetables requiring but little culture, and may be had fit for use the entire season. The main crop is sown in September. It is sometimes covered up in exposed places with straw or salt hay during winter, which prevents it from being cut with frost: but in sheltered fields there is no necessity for covering. For summer use it may be sown at intervals of two or three weeks from April to August. Spinach is best developed and most tender when grown in rich soil.

Prices on all varieties as follows: Pkt., .05; oz., .10; 1/4 lb., .15; lb., .35.

Giant Thick Leaf. This variety gives the best results. The leaves are large, thick and somewhat crumpled, and it is equally good for spring or autumn sowing.

SIMPLEX SEPARATOR

Cannot be beaten. The easiest running, cleanest skirming, simplest in construction and less work to clean of any machine on the market.

Send for Special Catalogue if interested in the best machine to be had.

SPINACH-Continued

Bloomsdale Savoy-Leaved. A heavy cropper of fine quality and very hardy; succulent leaves, curled and wrinkled like a Savoy cabbage; hardiest and most productive sort.

Victoria. A variety with heavy, broad, dark green leaves. Valuable for spring sowing

New Zealand. A valuable variety for the garden as it produces the thick, tender leaves throughout the summer. Grows very large and luxuriantly in warm, rich soil.

Long Standing Thick Leaved. Stands longest before running to seed; dark green.

SQUASH

German,—Kurbiss. French,—Courge. Spanish,—Calabaza.

One ounce Early will plant 50 hills; one ounce Marrow, 25 hills.

Culture. The plants are very tender and sensitive to cold, and planting must be delayed until settled warm weather. The general principles of culture are the same as those given for cucumbers and melons, but the plants are less particular as to soil. The summer varieties should be planted four fee apart each way, and the winter sorts eight feet. Three plants are sufficient for a hill. Care should be taken not to break the stems from the squashes intended for winter use, as the slightest injury will increase the liability to decay.

Delicious. We have found the squash all that the originator claims for it. It is the driest, sweetest and finest flavored squash we have ever tasted; a fall and winter squash and is a good keeper.

F'kg., .05; oz., .10; 1/4 lb., .30; lb., \$1.00.

Bay State. Has a hard green shell; good for fall and winter use.

F'kg., .05; oz., .10; 1/4 lb., .25; lb., .75.

Boston Marrow. Fine fall variety; oval, bright orange; flesh yellow and firm; best for pies, and also for canning.

Pkg., .05; oz., .10; 1/4 lb., .25; lb., .75.

Improved Marblehead. Resembles the Hubbard but is earlier; has a gray, hard shell; a very popular winter sort.

Pkg., .05; oz., .10; 1/4 lb., .25; lb., .75.

Early White Bush Scalloped. A standard summer variety; good either for home or market garden.

Pkg., .05; oz., .10; 1/4 lb., .25; lb., .75.

Essex Hybrid, or Hard-Shelled Turban. A standard winter sort; flesh a trifle darker than the Hubbard; an excellent keeper.

Pkg., .05; oz., .10; 1/4 lb., .30; lb., \$1.00.

Giant Summer Crookneck. Double the size of an ordinary Crookneck and very warty but similar in other respects. Their handsome appearance commands an extra price in the market.

Pkg., .05; oz., .10; 1/4 lb., .30; lb., \$1.00.

Winter Crookneck. An excellent keeping Crookneck variety, lasting several months. Yellow skin and a well-known squash.

Pkg., .05; oz., .10; 1/4 lb., .30; lb., \$1.00.

Improved Hubbard. The well-known and standard late variety; our strain is excellent.

Pkg., .05; oz., .10; 1/4 lb., .30; lb., \$1.00.

Golden Hubbard. A genuine Hubbard Squash except in color, which is a bright red; quality excellent.

Oz., .10; 1/4 lb., .30; lb., \$1.00.

Warted Hubbard. A superior strain of mammoth size, and entirely covered with warty excrescences. Rich, dark-green color, and of very best quality.

Pkg., .05; oz., .10; 1/4 lb., .30; lb., \$1.00.

Call and examine our new Columbia Seeder with Fertilizer attachment. If unable to call send for special circular.

GASOLINE ENGINES, WINDMILLS AND PUMPS

Will surely interest you. By the use of a windmill, or gasoline engine, at a very small expense, every Farmer can have running water in his buildings. Write us in regard to same or better still, call and examine our line.

Special catalogues on water systems can be had for the asking.

SUNFLOWER

Mammoth Russian. The standard large-growing variety, which is used largely for feeding poultry.

Pkt., .05; 1/4 lb., .10; lb., .20.

TOMATO

German,—Liebsapfel. French,—Tomate. Spanish,—Tomate,

In this latitude to produce extra early tomatoes the seed should be planted in the hot-bed about the middle of February, in drills five inches apart, and not over onehalf inch deep. When the plants are two inches high they should be transplanted three to four inches apart, and when about four inches high should again be transplanted; this time about five inches apart.

Dwarf Champion

Stone Tomato

Again they should be transplanted about the middle of April into moderately warm beds or frames, and should not be nearer than eight inches. The final transplanting to the open ground may be made the last of May, when the plants should be fine, large and stocky, and if sufficient soil is taken up with each plant they will keep right on growing with no setback.

For ordinary plants, sow the seed early in March, and transplant, once in the hotbed and from hotbed into cold frames about four inches apart. The last of May they will be ready for the open ground where the Dwarf varieties should be planted 3½ feet apart and the sperading varieties 4 to 4½ feet apart.

ties 4 to 472 feet apart

Dwarf Champion. Dwarf and strong habit of growth; very solid and of extra quality.

Pkt., .05; oz., .25; 1/4 lb., .75.

Earliana. It is remarkable for its earliness, very large size, handsome shape and bright red color. Its solidity and fine qualities are equal to the best medium and late sorts. Pkt., .05; oz., .30; ½.1.b, \$1.00.

Livingston's Favorite. Smoother than the Paragon is a darker red than the Perfection; ripens evenly, and is as early as any good variety. Pkt., .05; oz., .25; 1/4 lb., .75.

Livingston's Beauty. Very glossy, crimson in color, slight tinge of purple; early, free from rot; skin tough, bears handling remarkably well.

Pkt., .05; oz., .25; ½ lb., .75.

Ponderosa.
good flavor.
to weigh four pounds. Bright red. Very few
seeds
Pkt., .05; oz., .25; ½ lb., .75.

Stone. Fruit very large and deep; bright scarlet, smooth, ripening evenly to the stem, without a crack; exceedingly solid and firmfleshed, of the finest quality; one of the best for family use and for canneries. Late.

Pkt., 05; 0z., 25; ¼ lb., 75.

TOMATO-Continued

Acme. (Early). Well-known and generally cultivated. Smooth, and ripens evenly; color purplish red.

Pkt., .05; oz., .25; 1/4 lb., .75.

Matchless. Very large smooth, solid and fine flavor. Cardinal red.

Pkt., .05; oz., .25; 1/4 lb., .75.

Essex Hybrid. A very early sort, color bright pink; large size, solid, rich flavored; very productive; fine market variety.

Pkt., .05; oz., .25; 1/4 lb., .75.

June Pink. An early variety, similar in habit to the famous Earliana, differing only in its color, which is pink instead of red. Early, blight resisting, long and heavy yielding. An excellent shipper on account of its reasonably tough skin.

Pkt., .05; oz., .25; 1/4 lb., .75.

Chalk's Early Jewel. This is a very productive variety, ripens nearly as early as Spark's Earliana, but is more desirable for home use as the fruits are thicker through and more solid; borne in large clusters. Color bright scarlet and quality good.

Pkt., .05; oz., .25; 1/4 lb., .75.

TOBACCO

.Connecticut Seed Leaf. Best adapted for the climate of the Northern and Middle States. Pkt., .05; oz., .30.

TURNIP

German, -- Steckrube. French,-Navet. Spanish,-Nabo Comun.

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crops, and early in August for a fall and winter crop. A light soil, well manured the previous year, is the best, a few hundred pounds per acre of quick-acting fertilizer will have a tendency to make the roots smooth, and to make the rapid growth so essential in producing sweet and palatable Turnips.

Ruta Bagas, or Swedes, should be planted from the last of June to about July 10, as they require more time in which to mature than the Early or Strap Leaf varieties. Newly-turned soil will produce the sweetest and smoothest turnips.

Extra Early Purple Top Milan (Flat.) The earliest turnip in cultivation and a splendid variety; favorite with gardeners who want first turnips in market. white, flat, of medium size, with a bright purple top; one of the sweetest and finest flavored of summer sorts.

Pkt., .05; oz., .10; 1/4 lb., .20; lb., .65. Extra Early White Milan. This is one of our most popular turnips for spring sowing; it is a splendid extra early turnip in which the extreme earliness, small top and taproot of the Purple Top Milan is united with clear white skin and flesh.

Pkt., .05; oz., .10; 1/4 lb., .25; lb., .75. Purple Top Strap Leaf. Rapid grower and mild flavor. The most popular variety for early use, either for the table or stock.

Pkt., .05; oz., .10; 1/4 lb., .20; lb., .50. Yellow Stone. A very popular yellow-fleshed variety; fine for table use. Flesh very firm, tender, sweet and fine flavored; an excellent keeper.

Fkt., .05; oz., .10; 1/4 lb., .20; lb., .50.

White Egg. Belongs to the class of quickgrowing fall turnips, and for this purpose should be sown in this latitude between August 10 and 25. Its hape is nearly oval or egg, as its name would indicate.

Pkt., .05; oz., .10; 1/4 lb., .20; lb., .50.

RUTA BAGA OR SWEEDISH TURNIP

Rutabaga Bangholm. Oblong, globular shaped, with very small neck, yellow flesh, very dark purple top, superior to all other Swedes. One of the very heaviest croppers. Oz., .05; 1/4 lb., .15; lb., .45.

Long Island Purple (Skirving's). doubtedly the finest variety of purple-top Ruta Baga. Leaves few and small; bulbs fine shaped with very short, small necks; purple crown, skin and flesh bright yellow, solid, sweet and mild flavor.

Oz., .05; 1/4 lb., .15; lb., .40.

White Sweet German. Sweet, and fine flavor. Good keeper.

Oz., .05; 1/4 lb., .15; lb., .40.

Imperial Hardy Swede. Claimed by many to be the best Swede turnip grown. Bulb of large size with purple crown; flesh yellow; very smooth and a heavy cropper.

Oz., .05; 1/4 lb., .15; lb., .40.

SWEET POT AND

MEDICINAL HERBS

These are of easy cultivation. As a rule it is best to cut herbs when in flower, wilt in the sun and thoroughly dry in the shade.

GRASSES and GRAINS

NOTE—Owing to the frequent changes in price of Grains and Grasses, we have refrained from inserting prices of them in this catalogue. The lowest market price will be quoted on application.

Northern Grown
Grass Seeds

SPECIAL ATTENTION

Though we trust you will give your careful attention to the vegetable section of our seed catalog, we do not want to overlook that part treating on Northern Grown Grass Seeds.

While we carry several grades of the different varieties of seeds, we recommend our Purity Brand as the very best the market affords. These seeds are strictly Northern grown, and are selected by us because they possess the two essential qualities of purity and vitality. It is well known that there have been large quantities of Grass and Clover Seed sold as pure, which official analysis has shown to contain large percentages of adulteration. This not only defrauds the planter by selling him a worse than useless article, but inflicts injury also by filling his land with noxious weeds. We list Grass and Clover Seeds according to their quality, grading down from our Purity Brand, which is always the best.

Again we call your attention to the following pages, hoping that our grass-seed business may be of mutual advantage to us both.

TIMOTHY, CLOVERS, MILLETS, RED TOP

in several grades

LAWN SEEDS

Our own mixture, from the purest seeds obtainable

We make a specialty of GRASS SEEDS, and while we carry several grades from PURITY BRAND down, we always recommend the best, our

PURITY BRAND

We can surely please you on this brand

HINTS ON MAKING HAY About Cutting, Curing and Storing

Value of Hay Crop

The value of the hay crop to the farmer and especially to the stock feeder is not expressed by what it will bring on the market.

Aside from the market value there is the feeding value and the manureal value both of which cannot be computed in dollars and

Growing grasses supply humus to the land and some supply nitrogen, a valuable fertilizing element.

The feeding value is the one most influenced by the method of harvesting. Too early or too late cutting, too much exposure to sun and rain, destroys more or less of the value as a feed.

To save this loss is the object of careful methods of making hay.

When to Cut

The first thing is to know when to cut the different varieties of hay. If cut too early, there is a loss of weight and nutrients. If cut too late, there is a loss in digestible nutrients and palatability.

In the case of clover and alfalfa, any delay in cutting produces a shrinkage in the succeeding crop. Alfalfa produces from two to four crops each season and when each crop

CHOICE GRASS SEEDS

Orchard Grass. Grown in shady places for hay and in wooded upland pastures. Sow thirty to thirty-eight pounds to the acre.

Kentucky Blue Grass. For lawns and pastures. Sow thirty to forty pounds per acre.

English Blue Grass, Meadow Fescue. For wet or shaded. Sow thirty to forty pounds per acre.

English Rye Grass. For pastures and lawns, wet or shaded. Sow thirty to forty pounds per acre.

Wood Meadow. For pastures and lawns, wet lawns, wet or shaded. Sow thirty to forty pounds per acre.

Rhode Island Bent. For pastures and lawns of light, loamy soil. Sow thirty to forty pounds per acre.

Meadow Oat Grass. For hay or upland pastures. Sow forty to fifty pounds per acre. Sheep's Fescue. For sheep pastures. Sow thirty to forty pounds per acre.

Crested Dog's Tail. A strong, heady grass for dry upland playgrounds, lawns or golf links. Sow thirty to forty pounds per acre. Sweet Vernal. Annual. Used in lawn mix-

tures.

LAWN SEEDS

We can confidently recommend our Lawn Grass Seed as being unexcelled for the purpose of making a new and permanent lawn, which will retain its rich green color and velvety appearance throughout the entire summer and fall.

In making a new lawn, primary expense

is ready it should be harvested without delay.

It is best to cut alfalfa when the blossoms are about one-third out. At this time the plant possesses the greatest amount of digestible nutrients and if properly cured has no equal as a forage.

Clover should be cut when coming into full bloom, at which time a few of the heads are

beginning to turn brown.

If cut before this time, clover will be hard to cure; if cut later, many of the leaves will fall off and much of the feeding value be lost

The whole crop of either clover or alfalfa should be handled within a few days. Where large quantities are grown, it is advisable to use machines of large capacity in order to rush the work.

Timothy makes the best hay if cut when going out of bloom. If cut in full bloom, the blossoms will tend to make the hay dusty.

Cow peas make good hay when cut about the time the pods begin to appear.

Grains like wheat and oats should be cut for hay when the stalks first begin to turn yellow near the ground.

The time for cutting mixed crops like timothy and clover should be determined by the condition of the one which predominates.

FOR LAWN AND FARM

should be deemed secondary to ultimate effect. We offer strictly high-grade mixture of the purest seed obtainable, entirely free from weeds and foreign seeds, at reasonable prices.

To obtain satisfactory results we recommend sowing at the rate of eighty pounds per acre.

Purity Brand. Lb., .35c.

Frime Brand. A very good mixture for lawns composed of high-grade seeds.

Lb., .25; 100 lbs., \$20.00.

Purity Brand. The average farmer when he seeds down his grassland buys the Timothy his country dealer has to sell, which is usually anything from a third to a tenth grade, and may be very good or very poor. Our Purity Brand of Timothy, like our Purity Brand of Red Top, is the very best obtainable, and was found to be 99.8 per cent. pure by the last official analysis.

Fancy. A very fine grade but does not analyze quite as pure as our Purity Brand.

Best Prime. Much better than Prime com-

monly sold

RED TOP

Purity Brand. This is the very best grade of Red Top to be found at any price. A recent State analysis of same pronounces it 98 per cent. pure.

Choice. This is a very close second to our Purity Brand.

Prime. This is a clean and handsome seed showing a high percentage of purity.

CLOVERS

RED CLOVER

Our Purity Brand of Red Clover is a Northern-grown seed, very large, well colored, and the purest obtainable. Frequent analysis of this brand pronounce it about 100 per cent. pure. Lower grades at lower prices.

Mammoth Pea-Vine Clover. Similar to Red Clover, but makes a larger growth with heavier stock. Sow eight to ten pounds per acre.

WHITE CLOVER

Purity Brand. Selected especially for Lawns.

Prime. For lawns and pastures.

ALSIKE

It is usually sown with other seeds for hay; a valuable fertilizer if plowed under when in full bloom. Productive and sweet. An excellent honey plant for bees. Sow eight to ten pounds per acre.

Purity Brand. This is in the same class with our Purity Brand Red Clover, and analyzes nearly as high.

Prime. High grade but not as pure as Purity Brand.

ALFALFA CLOVER

Alfalfa or Lucerne Clover yields a very heavy crop; it is grown successfully in the West and Middle West, and by liming properly drained soil is yielding most satisfactory results in New England, and when well started will endure most severe droughts.

CRIMSON CLOVER

Crimson. (Scarlet or Italian.). Grown in pastures and for turning under. Very deep rooting. Sow ten to fifteen pounds per acre.

WHITE SWEET OR BOKHARA CLOVER

Sweet Clover is grown for bees, for hay, for green forage, but its greatest importance is in its value as a pasture plant and as a fertilizer.

It is a biennial leguminous plant of tall, shrub-like growth, somewhat like a coarse alfalfa, growing 8 to 10 feet high. Its blossoms, which rarely appear until the second year, are white and give a strong smell of honey, quite perceptible some distance away. If not allowed to reseed, it will die out the second year.

Soil.—Sweet Clover grows in all parts of the United States; it possesses a wider adaptability in regard to soil and climate than any other clover or alfalfa. It thrives on the poorest, sandy soil and on dry hill sides, where no other clover will grow.

MILLETS

Hungarian. Used for hay and forage. Sow forty to fifty pounds per acre between the first and middle of June. Yields heavily and when well cured is excellent hay for cattle, increasing the flow of milk.

Japanese. This grows very tall, yielding heavily, and the demand for it is increasing rapidly. Sow thirty-five to fifty pounds per acre. Excellent for silo.

Siberian. Very similar to the Hungarian, maturing about the same time, but leaves are usually wide and tender, starting close to the ground, continuing nearly to the top of the stem, yielding more heavily, making it in many respects preferable to other millets. Sow twenty to twenty-five pounds per acre.

GRAINS

Prices subject to Market Changes
Barley, Fancy No. 1, Montana Two-Rowed.
Barley, Beardless.
Seed Oats, No. 1, Montana choice.
Spring Rye. Best Northern grown.
Winter Rye. New England grown.
Spring Wheat. Northern grown.
Winter Wheat. Northern grown.

MISCELLANEOUS SEEDS

Buckwheat.

Prices subject to Market Changes
For growing Fodder and Fertilizing Crops.
Canada Field Peas. The old standard variety for sowing with Oats for green fodder.
Very valuable also as pigeon feed.

Dwarf Essex Rape. Excellent for pasturing for sheep or hogs, also for soiling.

Vetches or Tares. Sand, hairy or winter. A very hardy plant, growing well on the poorest of sandy soil. When mature it reaches a height of about 3 feet and if cut for forage as soon as full grown and before setting seed, it will start up again and grow a second crop as large as the first.

Sunflower, Mammoth Russian. Used to some extent for ensilage. Plant with ensilage corn 3 or 4 pounds to the acre.

MONTANA OATS

OUR PURITY BRAND of Montana White Oats is the heaviest cropper we have ever known and yields from 10 to 20 per cent. more oat and straw than any other seed oat we have seen.

MONTANA BARLEY

THE PURITY BRAND of Montana Barley which we carry produces large nearly white berries and is a very heavy yielder. This Barley has been growing rapidly in popularity the past few years and we have the highest quality of seed to be found. Samples and prices will be sent on application.

INSECTICIDES and FUNGICIDES

APPLES-Scab-Use Formula No. 8 before the flower buds open, repeat just after the flowers fall. If the orchard is badly infected, repeat at intervals of three weeks with two more sprayings.

Bitter Rot-Use Formula No. 5 about the middle of June, or if it has not previously been serious, spray when the disease appears. Give two or three other sprayings at intervals of about three weeks.

Canker Worm, Codling Moth, Curculic, and other Biting Insect-Use Formula No. 2.

Leaf Curl- Use Formula No. 5 or No. 8 when the trees are dormant. San Jose Scale-Use Formula No. 8 when the trees are dormant,

PEARS-Scab and Leaf Spot-See under Apple.

RASPBERRY, BLACKBERRY and DEWBERRY-Anthracnose-Cut out all infected canes in the Spring and use Formula No. 5 before the buds open. Spray again at intervals using the same formula. As the fruit ripens use Formula No. 9.

STRAWBERRY-Mildew-Use Formula No. 5 at first sign of disease

Rust-Use Formula No. 5 before the buds open. Formula No. 9 before the fruit ripens.

After fruiting apply with Formula No. 5 again as may be needed,

POTATO—Blight, Rot and Beetle—Use Formula No. 2 or No. 4 when either appears and again at intervals of ten days as long as either is prevalent. The Bordeaux Mixture is for the Blight and Rot, and the Arsenate of Lead or Paris Green is for the Beetles, but either may be used in combination with the Bordeaux Mixture.

TOMATOES-Blight and Rot-Use Formula No. 5 when first fruitis half grown. Spray again in ten or fifteen days. Formula No. 9 should be used when the fruit is ripening if

any spraying is necessary at that time.

DANDELIONS-Use Formula No. 10. Do not spray for two days before or after cutting the lawn. Most effective if it does not rain for 20 hours after spraying. Water the lawn and allow the grass to dry before spraying. Young plants should only require one spraying. Old plants are resistive, so repeat when they grow up again. When dandelions are dead, seed in with grass at once. Sulphate of Iron is not poisonous but will discolor clothing.

WILD MUSTARD-See under Dandelions. CANADA THISTLES-See under Dandelions.

SPRAY FORMULA

- 1. ARSENATE OF LEAD-Use from 3 to 5 lbs. Arsenate of Lead to 50 gallons of water. ARSENATE OF LEAD AND BORDEAUX COMBINED-Use from 3 to 5 lbs. Arsenate of Lead to 50 gallons of Bordeaux Mixture. The Arsenate of Lead is used as an insecticide, and the Bordeaux Mixture as a fungicide especially recommended for pre-
- venting blight. PARIS GREEN- Use 1 to 2 lbs. Paris Green to 50 gal. water. Paris Green should not be used on peach, cherries or Japan plums, and only with extreme caution on other stone fruits. In mixing Paris Green solutions add Milk of Lime, which will prevent
- the burning of foliage. PARIS GREEN AND BORDEAUX COMBINED-Use 1 to 2 lbs. Paris Green to 50 gal.
- Bordeaux Mixture. BORDEAUX MIXTURE-Copper sulphate 5 lbs.; Lime 5 lbs.; Water 50 gals. In preparing use two one-half barrel tubs. One for Copper Sulphate and the other for the Milk of Lime. The two solutions are now poured into a barrel at the same time. the Lime solution should be kept well stirred. Two men are required to make Bordeaux Mixture, so as to get the two liquids poured into the barrel evenly.
- KEROSENE EMULSION-Kerosene, 2 gallons; Whale Oil Soap, 1/2 pound; Soft Water, 1 gallon.
- 7. TOBACCO DECOCTION-Tobacco Stems and other refuse tobacco, 1 pound; Water, 2 gallons. Boil tobacco stems and other refuse tobacco thoroughly in the water. This solution is sufficiently strong for aphides and other very delicate insects.
- LIME SULPHUR SOLUTION-We find from experience that the Commercial Lime Sulphur Solution is much preferable to the home made solutions as, generally speaking, the mixture is better, being less liable to foliage injury and causing no trouble by clogging of spray nozzels, etc.
- AMMONICAL COPPER CARBONATE—Copper Carbonate 6 ounces: Strong Ammonia (just enough to dissolve the Carbonate) about 3 pints; Water 50 gallons. This is for use only when the fruit is ripe, or nearly so, and we do not wish to discolor it with Bordeaux Mixture.
- 10. SULPHATE OF IRON-Dissolve 4 pounds Sulphate of Iron in 2 gallons of water. Strain the liquid carefully through a fine screen of cheesecloth.
 - We have everything in Spraying Machinery including Hand, Traction and Gasoline Power Outfits. Send for descriptive matter or else call at our store and examinethem

INSECTICIDES & FUNGICIDES—Cont'd PURE PARIS GREEN ANSBACHER'S

After having tried several of the other kinds of Paris Green we are convinced that Ansbacher's has no superior, consequently are handling this kind exclusively.

The price of Paris Green not being established at this time of going to press, we will be pleased to quote prices on application.

GRASSELLI ARSENATE OF LEAD

Grasselli Arsenate of Lead Paste contains 15 per cent. Arsenic Oxide, combined with the maximum amount of lead consistent with good mixing qualities.

It contains less than one-half per cent. Soluble Arsenic.

Will- all leaf acting ing

Kills all leaf-eating insects. Mixes readily with water. Sticks to the foliage.

Grasselli Arsenate of Lead is used to destroy all leaf-eating insects attacking fruit trees, shade trees, vegetables, flowers and shrubbery, such as Codling Moth, Curculino, Canker Worm, Tussock Moth, Elm Leaf Beetle, Gypsy and Brown Tail Moths, Potato Beetle and all similar insects that feed upon the fruit and follage.

Mix with the required amount of paste as received, enough water to make a thin paste that will pour readily before putting into

the spray tank.

Apply thoroughly in a fine mist under good pressure as soon as the insects put in their appearance, or where past experience has shown that certain insects are to be expected at a certain time, it is well to apply Arsenate of Lead in advance of their appearance.

It should always be borne in mind that all insect pests can be more readily killed when young and before they have attained their

growth.

Grasselli Arsenate of Lead Paste may be used with either Lime Sulphur Solution or Bordeaux Mixture, combining in one application treatment for both insects and fungi. GRASSELLI ARSENATE OF LEAD POWDERED

Grasselli Arsenate of Lead Powdered is usually used in the dust form. Apply as received, by finely dusting on the foliage. If mixed with water use 1 pound to 1½ pounds to 50 gallons of water except for Potato Beetles. Use two to three pounds to 50 gallons of water on potatoes, applying 50 gallons or more per acre.

GRASSELLI LIME SULPHUR SOLUTION
Grasselli Lime Sulphur Solution contains
33 per cent. combined linie and sulphur in solution at 32 to 33 degrees Beaume, the maximum that will stay in solution under the various climatic conditions to which it is liable

to be exposed.

It is a clear, cherry color liquid, free from sediment and works through the nozzles easily.

Grasselli Lime Sulphur Solution is used as an insecticide to control San Jose Scale, Oyster Shell Scale and all sucking or scale insects. For this purpose it is used at a dilution of 1 gallon to 9 to 11 gallons of water and applied during the dormant season, either after the leaves drop in the Fall or before the buds open in the Spring. The Spring applications just before the buds open, will control Leaf Blister Mite, Plant Lice and Peach Leaf Curl, in addition to the scale insects, and is usually considered advisable in well cared for orchards where the scale is already under control and where the entire orchard can be gone over in the Spring.

Grasselli Lime Sulphur Solution is also used as a Summer spray to control Scab, Leaf Spot and similar fungous diseases on

apples and pears.

On apple and pear foliage, it should not be used stronger than 1½ gallons to 50 gallons of water. Some prefer 1¼ gallons to

50 gallons of water.

Lime Sulphur Solution as a Summer spray replaces Bordeaux Mixture. The use of Lime Sulphur Solution and Bordeaux Mixture in same application is unnecessary.

"CORONA DRY" ARSENATE OF LEAD Corona Dry Arsenate of Lead is distinctive for quick poisoning, even application and great adhesiveness.

Its purity and unusual chemical activeness

give it highest poisoning power.

One pound of "Corona Dry" will do the work of three pounds of paste and do it better.

"Corona Dry" is absolutely safe and will not "burn."

"Conora Dry" can be kept indefinitely will not freeze, dry out, cake or lose its strength.

"Corona Dry" contains no water, therefore, there is no shrinkage, seepage or evaporation.

"Corona Dry" is

GUARANTEED

Pure containing nothing but Lead Oxide and Arsenic Oxide. Every package contains full net weight.

"Corona Dry" can be weighed or measured easily and correctly. "Corona Dry" is a perfect dry, fine, white powder, which mixes easily and readily in water. No working up needed. Merely shake proportional amount into spray tank as needed. No waste. No straining is needed—no sediment—no lumps. Never clogs spray nozzle.

Prices: 4-oz, bottles, .25 each; 1 gal, cans, \$1.75 each.

Call and examine our line of Sprayers. Everything from the small 35c tin sprayer to the large Orchard and Potato Power Spravers.

HUBBARD'S

Bone and Blood Fertilizers

The Great Crop Producers

There are so many goods being manufactured today in the cheapest possible way, that we can demonstrate to your satisfaction the superiority of this brand. They cost more to make than others because the ammonia is derived from blood, fish, sulphate of ammonia, nitrate of soda and tankage, and not from ground leather, scrap, hoof meal, hair and similar insoluble forms of ammonia. The Phosphoric Acid used in Hubbard's Fertilizer is derived from dissolved bone instead of dissolved rock, and in consequence is more valuable. The Potash is derived from High Grade Muriate of Sulphate.

Special Notice.

Owing to the unprecedented condition of the Potash Market caused by the great Europan War, all fertilizer manufacturers have had to greatly reduce the amount of potash in their various brands, and in fact, a great many grades have been entirely cut out. In the four Hubbard's Brands that will be registered in Maine this season and listed below, the manufacturers have maintained their usual high grade qualities, simply reducing theamount of potash but not cheapening the product otherwise.

HUBBARD'S BRANDS FOR 1915

We enumerate herewith a list of brands carried by us, showing their guaranteed analysis. The actual analysis has exceeded these figures.

HUBBARD'S MAINE POTATO GROWER

For Irish and Sweet Potatoes, Cabbage, Onions, etc. A Very High grade fertilizer.

Fertilizers and Chemicals (Continued)

AGRICULTURAL LIME

Is your land sour? Does it yield poorly? Is it worn out? Then apply R-R Agricultural Lime, manufactured by Rockland-Rockport Lime Co., Rockland, Me.

Prepared especially for farmer's use., put up in jute sacks. It is ready for immediate use, no slacking being required. It will keep indefinitely in a dry place, and is fine and uniform, so that it can be applied with a spreader if desired. Lime neutralizes the acid, causes clay soils to become more pri-able, and sandy soil to become more compact. Lime by itself will not sustain fertility, but increases the efficiency of fertilizers which may be applied.

Price: Per ton \$8.50; per 100 lbs. .50. Special prices on car lots.

PREPARED BORDEAU LIME

It is exactly right for the purpose, and is ready for immediate use, and there is no waste. Requires no slacking or preparation of any sort, hence a great saving of time and labor. Will keep any length of time without deterioration.

Per ton \$14.00. Per bg. 40 lbs. .35.

HIGH GRADE CHEMICALS

Chloride of Lime Sulphate of Copper Sulphur Pine Tar Lve or Potash Sulphate of Iron Coal Tar Fine-Ground Bone

BEST OF GROUND PLASTER BOWKER'S AMMONIATED FOOD FOR FLOWERS

A dressing made especially for plants grown in the home, garden or conservatory. Price: Small, 15c; Large, 25c. Postage 5c either size.

VERDANTINE PLANT FOOD

VERDANTINE contains chemicals which are odorless and non-poisonous to handle, sweet, clean and healthy.

VERDANTINE added in small quantity to the water will keep cut flowers fresh and verdant

There are a great many so-called plant foods. Some are really good, others are positively bad, because, instead of being real foods, they are simply stimulants. DANTINE is guaranteed to be a food.

8 Oz. Pkg. 25c. Postage 5c extra.

STERLINGWORTH PLANT TABLETS are a clean, odorless, concentrated, plant stimulant and invigorator. If you want luxuriant, healthy plants, ferns and beautiful flow-

ers, these tablets are just what you are looking for. Prices: (100 tablets) sufficient for 35 plants 3 months, 25c.

POULTRY SUPPLIES

POULTRY SUPPLIES

(Continued)

"THE BOSTON" POULTRY DRY FEED HOPPER

POULTRY DRY FEED HOPPER

The Dry Feed Hopper System of feeding is endorsed and recmmended by practically all the experimental stations and is in use in most of the large practical plants.

Manufactured in Four Sizes Chicken Hopper, small size, \$1.00. For use

in small brooders.

Chicken Hopper, large size, \$1.90. For use in broader houses.

Small Hopper, holds 8 quarts, .90. For beef scraps, shells, grit or charcoal.

Large Hopper, holds 16 quarts, \$1.00. For dry feed for hens.

PEERLESS DRINKING FOUNT

Very easy to clean by simply removing the bottom. Can either be hung on the wall or by the bail. A very desirable fount. Price, 5 qt., .60.

PEERLESS BROODER FOUNT

Just the fount for your brooder. Can be set on the floor or hung on the wall within reach of the chickens. Can be cleaned same as large founts. Price, 30.

Try our Sun Chick Starter and Globe Chick Feed; it will pay you.

NESCO DRINKING FOUNTAIN

An extra good quality drinking fountain, which has an especial advantage of the top coming to a point. This prevents chickens or fowls from tipping over the fountain as easily as other styles.

Prices, 1 qt., .20; 2 qt., .25; 4 qt., .35; 8 qt., .50

THE NATICK DRY MASH FEEDER

The most economical and sanitary feeder for Dry Mash that has yet been offered. Positively no waste and no clogging of the feeder.

Made in one size only.

Price, \$1.25

POULTRY KILLING KNIVES

These knives made of the best steel and of special design. Price, .50 each

GRENIER CAPONIZING SET

Designed to simplify the operation of caponizing, so that the beginner can easily master it. This set consists of a lancet shaped knife, spring spreader, forceps, hook, ring probe and canula. Price in velvet lined case.

HASKELL IMPLEMENT & SEED CO., LEWISTON, MAINE

POULTRY SUPPLIES, Cont'd 2-PIECE DRINK FOUNTS CHICK FEED TROUGHS

Black Iron, galvanized after fount has been completed. This assures a smoother, better-looking fountain and keeps the edge at the top from rusting. When the galvanizing is done first, turning the edge cracks it and makes it liable to rust.

Small, .20; Medium, .25; Large, .35. WALL FOUNTS

All these wall founts have hoods over the troughs, which prevent dirt from settling in the water. Can be hung up on wall, and for this reason are preferred by many to the 2-piece fount, which must be placed on the floor.

1 Gal., .55; 2 Gal., .75.

DROP-BOTTOM FOUNTS

28-gauge galvanized steel. Easiest thing in the world to open and clean. Clasp by which the bottom is fastened fits over the small hole under the hood, preventing slopping of water when the fount is handled. Solld brass hinge rod—no rust.

2 Quart, .45; 1 Gal., .60.

10-inch, .30; 20-inch, .50.
ROUND-BOTTOM DRY-FOOD HOPPER

The hopper you will eventually buy. Sure to replace all other makes of dry-food hopper. Owing to the rounded bottom, dry mash and beef scrap feed readily and never clog. An "H-I" specialty that we're proud of. With or without lid.

With lid, .75.

Favorite Dry Mash Hopper

Years of experience with this type of Hopper, with changes from time to time to improve it, has enabled us to put on the market a Dry Mash Hopper that fulfils every need. The wire grid is raised or lowered as required for coarse or fine mash. The curved bottom of the hopper always keeps the feed within easy reach of the birds. The flange at the edge prevents any possibility of waste and the small wires extending from the flange to the wire grid prevents the birds from throwing the feed sidewise out of the hopper. The most distinctive feature about this Favorite Dry-Mash Hopper is the fact that it is an inch wider at the low-

er side than at the top, thus making it utterly impossible for the food to clog. 12-in. 12 qt., Price \$1.00; 18-in. 18 qt., Price \$1.25; 24-in. 24 qt., Price \$1.50.

POULTRY SUPPLIES-Continued

WATER GLASS (Silicate of Soda)

When your hens are laying well and eggs are plenty then is the time to put some away where you can have them when they are scarce and high. The simplest and best preservative known is Water Glass. 1 gal. of this with 10 gal, water will keep your eggs perfectly fresh almost indefinitely. It is clean, easy to prepare, gives universal satisfaction and price is reasonable.

Price: Qt., .25; gal., .65.

The 6 in 1 Exerciser and Feeder

S JUST what its name implies. It is a large, rust-proof, galvanized, steel hopper supported on four strong iron legs and devised to hold all the food necessary for poultry. The center hopper holds the mixed grain food, generally composed of cracked corn, wheat, Kaffir corn, buckwheat, barley, oats, etc., and is so constructed that an agitator underneath, containing whole corn as bait, can be worked by the fowls to scatter broadcast a small amount each time of the dry grain mixture. It gives the hens the necessary exercise hunting for the grains. Surrounding this center hopper are six compartments made to contain dry mash, beef scrap, grit, charcoal, oyster shells, etc., easily accessible to the fowls, and the feeder is so constructed that no food is wasted. cover is conical in shape, preventing roosting upon it. Price, 20 qts., \$3.75.

DR. HESS INSTANT LOUSE KILLER

Destroys lice on poultry, stock of all kinds and ticks on sheep. It is a powder put up in round cans with perforated top. and sold on a written guarantee.

Price per pkg., .25.

NAPTHOLINE NEST EGGS

These are the standard combined nest egg and lice killer. Are used in the nest in the same manner as the ordinary nest egg. Rids laying hens of lice and mites, keeping the nest sweet and clean.

HASKELL'S HOMEOPATHIC POULTRY REMEDIES

Haskell's Homeopathic Poultry Remedies are put up 10 tablets to a vial, each vial being labeled with complete directions and showing dosage and the disease which the remedy will prevent or cure. The vials are encased in strong, wooden screw-capped mailing tubes, to prevent breakage. They are administered in the fowl's drinking water.

1, for Indigestion and Constipation.

No. 2, for Rheumatism and Cramps.

No. 3, for Colds.

No. 4, for Bronchitis and Croup.
No. 5, for Cholera.
No. 6, for Vent, Gleet and Canker.
No. 7, for Chronic Catarrhal Colds. No. 8, for Disorder of Egg Organs.

No. 9, for Eye Diseases.

No. 10, for Worms.

When ordering specify number required. Price: Per vial, postpaid, .40 each.

NUTRINE CHICK SALTS

ESSEX-MODEL NUTRINE CHICK SALTS fulfill the need of the chick for animal and mineral food which is often lacking in foods fed to chicks when in confinement. It aids digestion and prevents diarrhoea. These salts are not a purgative, but a tissue builder, and a wonderfully effective food-salt. Costs five cents a week for fifty chicks.

Frices: 2-lb. package, .50; 5-lb. package, \$1.00.

TRADE-HASKELL'S-Name ROUP CURE

Guaranteed to Relieve or Money Refunded.

Haskell's Roup Cure is put up in one size package only. This package contains sufficient remedy for making 25 full strength gallons of the remedy.

We guarantee Haskell's Roup Cure, when used in accordance with directions on each package, to relieve roup, and will refund the purchase price if it fails to cure, except in cases where the fowls have reached the last and incurable stages of the disease.

Price: .50.

Keep your poultry houses clean and sweet by constant spraying.. Call and see our line of Sprayers, Spray Pumps, etc.

"PURITY BRAND" POULTRY FEEDS

ALWAYS READY

NO WASTE

NO DIRT

Our trade-mark brands of Poultry and Chick Feeds represent strictly high-grade mixtures,—manufactured from Sweet, Sound, Cracked Grains and Seeds—scientifically proportioned and in sizes best adapted for feeding, carefully sifted and recleaned. No pains are spared to produce Feeds of the greatest value—best quality and uniform grade—the standard of which is maintained at all times.

It is a recognized fact that sound and sweet grain contains a larger percentage of nutriment, strengthening and fattening properties, naturally producing better and quicker re-

sults than unsound, damaged and musty material.

"CRESCENT" now GLOBE

CHICK FEED

A Complete Grain Feed for Chicks from Time They Are Hatched until 8 or 10 Weeks Old.

CLEAN SOUND SWEET

A standard mixture of recleaned Cracked Grains and Seeds, Hulled Oats, fine Granulated Bone and fine Charcoal. Specially selected for size, and composed of ingredients necessary in promotting healthy and rapid growth.

This is the critical period of chick life, and Globe Brand is prepared especially

to meet the emergency. It produces healthy and rapid growth, and is intended for feeding until the chickens are large enough to be fed the coarser Developing Feed.

"COLONIAL" now GLOBE DEVELOPING FEED

An Intermediate Feed for Growing Chicks.

A Coarse Grain Chick Feed to meet the requirements of growing chicks from the time they have outgrown the Globe Chick Feed until large enough for Globe Scratch Feed.

Screened and graded to adaptable size. Mixed and recleaned by the most approved methods. This feed like all other "Dickinson's Brands" is composed of the choicest materials obtainable.

"GLOBE" SCRATCH FEED

A Balanced Grain Ration Poultry Feed for Grown Fowls. Suitable at All Seasons. CLEAN SWEET SOUND

Under this brand we ofer our standard mixture of Poultry Feedmanufactured from selected Cracked and Whole Grains and Seeds, scientifically mixed to furnish a complete balanced ration, with an assortment of material best adapted

for rapid growth and egg production. The protein, fat and carbohydrates are so maintained as to form the greatest feeding value and produce the best results. QUEEN POULTRY MASH
Contains Alfalfa Meal During Winter.
Froportions changed to meet requirements
of different season.

CLEAN SWEET SOUND

A selected mixture of ground feeds manufactured from the choicest, sound, sweet and wholesome grains. It is carefully prepared and contains ingredients in proper proportions essential to the health and growth of the

£1

Splendid bone builder and especially helpful during the molt. Also contains Beef Scraps and Charcoal, recognized necessities for health and egg production.

GLOBE EGG MASH

Invaluable as a Supplementary Feed for Winter Laying. 15% Meat Scraps and Oil Meal—16-18% Promoistened as preferred. The tein. Can be fed dry or regular grain ration should be supplemented once a

day by some mixture of ground feed containing high protein. An Ideal Feed for Growing Fowls and Laying Hens.

Hens.

Note what one of our prominent Poultry raisers say in regard to our Purity Brand Chick foods:

January 6, 1914

Haskell Implement & Seed Co., 194-200 Main St., Lewiston, Maine.

Gentlemen:

Replying to your inquiry of the 3d inst. regarding how we like the "Crescent" now Globe Chick Feed, will say that we have used it for several years in the rearing of from three to four thousand chicks yearly and like it very much.

We find it pure and wholesome and perfectly free from impurities, foreign seeds, etc., which chicks do not like.

We feel safe to recommend the "Crescent" now Globe Chick Feed to the public, as first class chick feed.

Very truly yours, (Signed) GEO. A. WISEMAN & SON, Lewiston, Maine.

THIS PAGE FOR POULTRY RAISERS

WE WANT TO HEAR FROM POULTRYMEN EVERYWHERE

who dread loss from Colds and Roup.

We will pay you 50 cents for the empty box if you buy a 50-cent package of Conkey's Roup Remedy and it does NOT do the

work for you. We mean exactly this.

Don't be too quick to use the hatchet—and don't stand by idle. Treat the first symptoms of sneezing, wheezing or moping. Don't take any chances, for ROUP is contagious, it spreads quickly through the whole flock. Don't be too late. Get Conkey's Roup Remedy. Wise poultrymen keep Conkey's Roup Remedy always on hand, to use at the first symptom, or better still to put in the drinking water oceasionally as a preventive.. 25c and 50c sizes, and remember this: YOUR MONEY

BACK IF any CONKEY Remedy EVER falls you! WE LIKE TO GET BACK OF A LINE that we can offer

our customers on this fair basis. We want to SAT-ISFY our customers. Look over the list below and order NOW what you will need. Remember the guarantee holds good on everything in the Conkey line, and there's no time limit on it.

Conkey's Cholera Remedy—For all forms of indigestion and so-called cholrea. 25c and 50c.

Conkey's White Diarrhoea Remedy—Very successful, both as remedy and preventive. We advise using this with all incubator chicks as an extra precaution. Easily given as it is put right in the drinlying water. CAN BE USED ALSO AS A CH OLERA REMEDY, in place of treatment listed above. 25c and 50c.

Conkey's Poultry Tonic—For moulting fowls or birds in any rundown condition. 25c. Conkey's Lice Powder—For dusting fowls and in nests nothing so effective. Rids your fowls of these pests and they can use their

energies for your profit. 15 oz., 25c; 5 oz., 10c. Conkey's Lice Liquid—For mites in poultry houses spraying with Lice Liquid is the commonsense treatment, as it gets in the cracks where the mites hide away. No use trying to treat mites with a powder—the mite is a special kind of chicken-louse, that hides in cracks during the day, and attacks the fowls at night. Conkey's Lice Liquid mixes with water, 25 to 50 parts as desired. This makes it very reasonable as well as effective. Price: 1 qt., 35c.

Conkey's Head Lice Ointment—A real chick saver—just a touch on the head of each little chick, also under the wings, will kill those murderous head lice that cause fully three-fourths of all chick losses, stunting, poor development, etc. Enough in 1 tube to save 100 chicks. Price 10c and 25c.

NOTE—We wish to emphasize the fact that there are THREE distinct kinds of chicken lice. They must be treated in three different ways, as no one thing will cover the life habits of all three kinds. Read this over again.

NOX-I-CIDE—The secret of a healthy flock is sanitation and disinfection. Nox-i-cide is Conkey's strictly high-grade disinfectant, dip, spray and lice liquid. It is a general purpose article and can always be relied upon to TOO LATE

prove effective. High in phenols. Not dangerous, and reasonably cheap, quality considered. It mixes readily with water, so that a gallon represents 50 to 100 gallons of

spray liquid. Pint can 35c.

What about EGGS? Conkey's Laying Tonic regulates and conditions fowls so they can make the most possible profit. A little in the mash feed once a day improves the ration, and brings better results from the same feed. It improves digestion and increases the vigor of the flock. Try it and you will soon see your fowls look better, act better, do better in every way. It does not break down the fowl. Its use with breeding stock improves fertility as well as increases the number of eggs. Conkey's Laying Tonic simply improves the condition of the fowl, so it can do its best for you. Fine for growing stock. Unrivalled for bringing molting fowls into condition. Stirs up the sluggish layers. Try it on guarantee, and remember the eggs will soon pay for it! Costs only 2 cents a month for each hen, so you can estimate it's a money maker. Try it-that's all we ask of you. YOUR MONEY BACK if not satisfied. 31/4 lbs., 50c; 1½ lbs., 25c.

NOTE—Send for complete list of Conkey's Poultry Remedies. Enclose 4 cts. with request and we will mail big 80 page Conkey Poultry Book FREE. Don't overlook this if you are interested in the management of

poultry.

STERLINGWORTH CHARCOAL

Is especially prepared for poultry, carefully screened and is different than other charcoals. Goods are put up in 50-pound burlap bags and in 2-pound paper cartons, in four sizes as follows:

Fine Powdered for Mash Food and Ducks, also Cattle and Hogs.

Fine Granulated for Brooder Chicks and Dry Chick Food Mixtures.

Medium Granulated for Half Grown Fowls, Pigeons, etc.

Coarse Granulated for Full Grown Fowls, Geese, Turkeys, etc.

Prices: 50-pound bags, \$85 each; 2-pound cartons, .10 each. Larger quantities a matter for correspondence.

And

Queen Poultry Mash

Makes 'Em Lay! Makes 'Em Pav!

MICO SPAR CUBIAL GRIT

Does not become smooth, but retains its cubical form until entirely worn out.

No. 1. For Turkeys.

No. 2. For Fowls.

For Growing Chicks, Pigeons and No. 3. Ducks

No. 4. Extra Fine, for Chicken Food. Price per 100-pound bag. .70

OYSTER SHELLS

Crushed and ground to the size which expert poultrymen agree to be the best. Every pound of shell we sell is all shell and no waste. Price in quantities quoted on application. 100-lb. bag, .70

High Grade Beef Scraps. Fine Cracked Bone for Chicks, Coarse Cracked Bone for Fowls. Feed Grains of all kinds.

PURITY MEDIUM CUT ALFALFA

As an accompaniment to the mash fed by some, and the dry feed by others, a vegetable food is indispensable, in fact no mash is complete without it. Among green feeds, Alfalfa stands at the top, and when used with the mash, Medium Cut Alfalfa is mixed dry with other foods, and scalded or boiled with them, as the poultryman desires. When fed in connection with dry grains it should be scalded in a trough or other vessel and left for the fowls to eat at will.

DR. HESS' POULTRY PAN-A-CE-A

Contains tonics that aid the digestion; it also contains iron for the blood and nitrates to expel poisonous material through the skin; it is the only reasonable way to produce eggs without stimulants that are injurious.

11/2-lb. pkg., .25; 5-lb. pkg., .60; 12-lb. pkg., \$1.25; 25-lb. pail, \$2.50.

IDEAL EGG BOXES

Just the thing for family egg trade. Shipped knocked down, easily set up.
Prices, 1 dozen size, .10 per dozen; .75 per

INTERNATIONAL SANITARY HOVERS

Advantages possessed by the International Sanitany Hover and not to be found in any other brooding device.

1. It is warmer at the curtain than near the center. This causes the chicks to distribute themselves just back of

the edge of the curtain, where they have a constant supply of fresh air and plenty of room.

2 It is entirely circular and has no corners for the chicks to crowd into.

3 The lamp holder can be lifted out through the top of the hover by a person standing up. This makes it unnecessary for the operator to kneel in dust or mud to tend his lamp.

It gives ample heat under the hover without so heating the surrounding floor space as to cause leg weakness among the chicks.

Send for Full Descriptive Catalog.

Price, \$8.50

EYRIE SHIPPING BOXES

A convenient, light and strong pasteboard box with handle for carrying or shipping fancy eggs for settings.

No. 1 for 15 eggs, each, .20; dozen, \$1.75 No. 2 for 30 eggs, each, .25; dozen, 2.50

PARCEL POST EGG SHIPPING BOXES

A corrugated pasteboard box of sufficient strength to withstand the hard usage of the Parcel Post and carry your eggs safely to market. We have them in one, two, three and five dozen sizes. Prices on application.

NEWTOWN COLONY BROODER

Coal-burning, Self-regulating.

Instead of spending time and energy attending ten or more small lamp brooder, and caring for the same number of small flocks, the poultry raiser now rears 500 or 1200 birds around one Newtown Colony Brooder that burns coal and automatically regulates its own temperature.

Instead of increasing the cost of insurance on his building or taking big chances of destruction by fire of his plant and chicks, as a result of burning oil, coal-burning Newtown Colony Brooders are now employed which are just as safe as the kitchen range and home heater.

Come see the one set up at our store and prove for yourself that your one best investment is Newtown.

Descriptive circular and prices sent upon request.

INCUBATORS AND BROODERS

WE ARE AUTHORIZED AGENTS FOR

GENUINE Cyphers Company Incubators STANDARD

MADE IN THREE STYLES-EIGHT DIFFERENT SIZES

For the season of 1915 we offer our customers the Cyphers Incubator Company's complete line of Incubators. These three styles of high-class, guaranteed hatching machines, running through eight different sizes, represent all that is efficient, convenient and reliable in incubator construction. In buying a Cyphers Company Incubator you take no chances.

These are machines that for fifteen years and more have been recognized as the "Standard hatchers of the world." Tens upon tens of thousands of them have been sold and are in successful use in every civilized country on the globe. They are used by more Government Experiment Stations, on more large, practical poultry plants, on more successful duck and egg farms, and by a larger number of foremost poultry breeders than all other makes combined. They are the last word to date in incubator building, not a penny being spared anywhere in their construction to make sure of their doing satisfactory work in all climes, under widely different conditions, in the hands of of all sorts of people. They are built to hatch and to last. With ordinary care they should last an ordinary lifetime. Every Standard Cyphers incubator is guaranteed by the manufacturers to do first-class work in the hands of every

STANDARD CYPHERS INCUBATORS

purchaser who will give it a fair trial. Are built in four popular sizes and at prices as follows: 70 eggs, price complete, \$15; 140 eggs, price complete, \$22; 244 eggs, price complete, \$32; 390-400 eggs, price complete, \$38.

COLUMBIA HOT-AIR INCUBATORS

Are built to meet the wide-spread demand for large-capacity, lamp-heated machines that can be sold at surprisingly low prices and yet be guaranteed to do high-class work. Have wooden cases, attractively finished in dark green, with brass trimmings and double walls. Seamless-bottom lamp bowls, best quality brass burners, zinc and steel stand-ard Cyphers toggle-joint thermostat and same regulating equipment as used on highest priced machines. Fume proof, forced draft heater asbestos covered and metal banded. Automatic in ventilation and embodies diffusive principle. Roomy chick nursery under egg trays. Are made in two sizes: 140 eggs, price complete, \$15.00; 250 eggs, price complete, \$19.00. Fully guaranteed.

MADE IN FOUR SIZES.

SUPERIOR HOT-WATER INCUBATORS

These machines are exactly what the name says. They are heated by hot-water, instead of with hot-air and are "superior" in every detail. The water boiler and tank (tubular) are of heavy-weight copper. Lamp has seamless bowl; burner is best on market. Incubator case is of wood, attractively finished in golden brown, with brass trimmings (hinges, buttons, etc.) and has double walls, with air space insulation. Are equipped with Standard Cyphers zinc and steel, toggle-joint thermostat and knife-edge regulator. Have forced water circulation and are automatic in ventilation. Roomy chick nurseries. Are built in two sizes: 65 eggs, price complete, \$10; 130 eggs (see illustration) price complete, \$14. Fully guaranteed.

Write for Large Complete Catalogue of Cyphers Incubators and Brooders.

INCUBATORS AND BROODERS-Con't.

Cyphers Company Brooders and Hoovers

STANDARD CYPHERS BROODERS

The Standard Cyphers Brooders are not only fire-proofed and insurable, but are most durable, convenient and most efficient indoor and outdoor brooders thus far invented and placed on the market. They are equipped with the same type of high-grade thermostat as used on the Standard Cyphers Incubator-you can therefore depend upon an even, steady temperature in the hover, and a lively, thrifty, growing lot of chicks.

These Cyphers 1915 Brooders, all sizes and styles, are

Style A. Two Apartment Brooder

self-regulating, self-ventilating and varmint-proof. They are usable also as colony coops for the growing chicks. They are easily and quickly converted into colony roosting coops by simply taking out the hover, which is made removable for that purpose.

Style B. Three Apartment Brooder

THIS DOUBLE USE of the Cyphers Brooder means a considerable saving of money. It makes a safe and comfortable enclosure for the young chicks at night, and saves the buying of a coop for them. These outdoor brooders, on account of their fire-proof construction, can be used indoors equally well. All Cyphers 1915 Brooders contain either two or three apartments. The popular Style B (shown in illustration herewith) contains three apartments: first, roomy space under the hover;

second, hover chamber; third, well-lighted exercising apartment. It has often been said by users of Cyphers Brooders that "They Mother the Chicks Better than a Hen."

Style C. 3-Apartment Outdoor Brooder (for cold climates) 19.00

CYPHERS ADAPTABLE HOVER

The Cyphers Adaptable Hover is Self-ventilating and Self-regulating. It supplies a continuous flow of fresh, pure, warmed air under the hover, and at the same time maintains a steady, uniform heat. All the essentials of successful brooding of chicks are automatically provided. Thousands of poultry growers use this hover in raising big, strong flocks of chicks. It is "adaptable" to use in Colony Coops, in portable houses, in home-made brooder coops, such as goods boxes, piano boxes, and organ cases, as well as in large brooding houses. It is

constructed entirely of non-combustible material, and bears the fire underwriters Inspected Brooder label. Capacity, seventy-five newly hatched chicks, or fifty chicks that are ten days to six weeks old. Price of Cyphers Adaptable Hover

Price of Cyphers Portable Hover

CYPHERS PORTABLE HOVER

The Cyphers Portable Hover is the only Self-regulating and Self-Ventilating Portable Brooding Hover thus far invented, and we guarantee it to be the best brooding device of the kind on the market. As it is equipped with the same high-grade thermostat as the Cyphers Incubators and the Cyphers Adaptable Hover, it maintains a steady and uniform heat. It is positively and infallibly automatic in ventilation, preventing the trapping of "dead air or poisonous gases underneath the curtain. A continuous supply of fresh, warmed air is automatically forced beneath the hover.

This Portable Hover, as its name indicates, can be picked up at any time, all complete, and moved about without hindering its operation. Very convenient for cleaning and moving. Rated capacity, seventy-five newly hatched chicks, or fifty chicks that are ten days to six weeks old,

Buckeye Incubators

GUARANTEED TO HATCH EVERY HATCHABLE EGG

During the 23 years that Buckeye Incubators have been on the market they have earned the reputation of being "The most satisfactory hatching device that has ever been produced."

These incubators will not only hatch more chicks and stronger chicks than any other incubator, but in addition to that, they are so simple that a beginner can operate them just as successfully as an experienced poultryman.

Each and every Buckeye is sold under an absolute guarantee to hatch every hatchable egg and we have no hesitation in recommending to our trade under that guarantee, because we have sold hundreds of them during the past four years that have given our customers the most remarkable hatching results.

Let us show you a Buckeye in operation and prove to you that they will hatch more chicks and better chicks than any old hen or incubator you ever owned.

WE HAVE THEM IN FIVE SIZES-60 EGGS TO 350 EGGS.

BUCKEYE INCUBATOR-STYLE E

The greatest hatching device ever produced at any price.

Not a toy-not an experiment.

Guaranteed to hatch every hatchable egg.

On the market 23 years.

Over 100,000 in successful operation.

BUCKEYE STYLE H

BUCKEYE STANDARD INCUBATORS

Equipped with every desirable device to be found on any incubator.

These incubators bear the Underwriters Fireproof Label.

Buckeye Brooders

It is a matter of record that poorly constructed brooders are responsible for the death of more chicks than all other causes combined, so we consider it most advisable to call particular attention to the importance of using a type of brooder which we know will properly care for the chicks after they are hatched.

INDOOR BROODERS

THE KINERSON COMBINATION BUTTER PRINTS

The Kinerson Prints are too well known to require elaborate advertising or testimonials. There are various devices on the market for printing butter, but the Kinerson Print has no real competitors. Its first cost is a trifle in advance of the cost of inferior goods, but no more so than is necessary to insure each customer of honorable business dealing, firstclass workmanship, skilled engraving executed to order, and a thoroughly practical, simple and convenient Print which is the fruit of years of careful study, experiment and improvement-a Print that will save many times its original cost, in valuable time, and will outwear any other Print on the market. The above statements are made in thorough good faith and the Prints themselves will demonstrate their truthfulness.

These Prints will be carved with any Initial, Monogram, or design wanted. Price including Cutters and Paddles, postage paid anywhere in New England.

1 lbs., \$3.70; 2 lb., \$4.70

CHAMPION MILK COOLER AERATOR A perfect Aerator, removing all flavors arising from excessive cabbage, turnip or

silo rations.

A complete deodorizer, removing the animal heat or cowy taste, and all odors arising from the absorption by the milk or stable or other unpleasant gases.

A thorough cooler, reducing the temperature of the milk in one minute nearly to the

temperature of the cooling medium.

It is equally well adapted to the use of any cooling medium, either running water, ice water, or, if a very low temperature is not required, ordinary well or spring water.

Is automatic, requiring no attention, while in operation.

Butter Paper

We handle exclusively the Pioneer Brand of high-grade vegetable parchment paper and guarantee it to be the very best obtain able. We solicit correspondence for large or small quantities in any size, plain, or printed with special design.

(Continued)

SMALL'S CALF FEEDER

WHAT IT IS. Small's Calf Feeder is a simple practical device for weaning and feeding calves, so simple and so practical that every calf owner will see the value of it at a glance.

WHAT IT DOES. It enables you to feed the calf in nature's old way. If you could afford to let your calf run with the cow until nature compelled it to seek food elsewhere, there would be no scouring, unheathy calves.

Follow nature; this feeder not only saves trouble and milk, but it prevents the calf from taking its food in the great gulps that play havoc with the digestive organs.

ARABIAN SCRATCH AND GALL CURE

It is a scientific remedy for scratches and grease heel. It works as horsemen like to have it. 4-oz. pkg., .25; 8-oz., pkg., .50.

BAG BALM

Cures chapped, cracked and sore teats, bunches, caked bag, chafing, cuts and inflammation.

Price, per Box, \$0.50

Small glass, floating, each

It is used as a local application on cows' bags and teats. It will cure caked bags in 12 to 24 hours, if taken at the start. 1½-lb. pkg., \$1.00.

Calves' Cordial

Is free if it fails to cure scours in cows and calves. 2-lb. pkg., 50c.

Kow Kure The Great Medicine for Cows Only

It acts upon the digestive, generating and milk-secreting organs, keeping the entire system toned up and in perfect working order. It goes to the roots of trouble, and cures cow diseases by removing the cause.

It prevents abortion, cures barrenness, removes retained afterbirth, prevents tuber-cutosis, stops the scours, cures milk fever caked udder, swelling in the bag, bloating, red water, increases the flow of milk, cures cows "off their feed," improves the quality of milk and makes cows pay.

Price, .50c. and \$1.00 per can

Grange Garget Remedy

Positively cures garget without in any way injuring the cow or lessening the flow of milk, and tones and invigorates the affected parts.

Price, .50c. per can

LAWN MOWERS

TOWNSEND'S VICTORY

It has Ball Bearings of the very highest grade exact to 1/4 of 1-1000 of an inch, which greatly reduces friction. Double Steel Ratchet, very swift and smooth in action, as well as exceedingly hard for durability. Triple Gear. Entirely enclosed, allowing no dirt or cut grass to find its way into the pinions or coggs; 10-in. wheels, 51/2-in, reel, 4 blades.

16-in., \$8.50; 18-in., \$9.25; 20-in., \$10.00

SUPERB

The very best Lawn Mower on the market 12-in, wheels, 7-in, reel, 5 blades, 1 5-16 in, wide crucible steel and oil tempered.

Price, 18-in., \$11.25; 20-in., \$12.00; 22-in., \$13.00.

COLDWELL GRAND HIGH WHEEL BALL BEARING

The only patent reversible blade ever put into a lawn mower.

Made in one piece of channelled crucible steel, this blade is far stiffer and more serviceable than the ordinary old-fashioned flat knife.

The blade will last for years. If it's injured, it takes just twenty seconds to reverse it, by loosening the adjusting screws, and you have a practically new machinetwo lawn mowers in one.

Price: 16-in., \$9.25; 18-in., \$10.00; 20-in., \$11.00

COLDWELL'S STYLE D LAWN MOWER

This is the best low priced Ball Bearing Lawn Mower on the market It is made by the Coldwell Lawn Mower Co., of Newburg, N. Y., who have the reputation of turning out nothing but the best in the Lawn Mower line. This machine has four revolving blades 10 in, drive wheels and Ball Bearings. Handsomely finished in black and gold. Price 14 in., \$4.60; 16 in., \$4.75; 18 in., \$5.00

COLDWELL'S STYLE F LAWN MOWER

Same as the Style D except it has 9 in. wheels and 3 revolving blades.

Price: 14-in., \$4.00: 16-in., \$4.25: 18-in., \$4.50

TOWNSEND'S FLYER

A splendid High-Grade Mower at a little lower price than the "Victory." Ball bearings entirely enclosed. Adjustments very simple. Knives very hard and of the best steel

14-in., \$5.00; 16-in., \$5.50; 18-in., \$6.00

THE LAKEWOOD

Ball Bearing-(9-inch Wheels)

The best medium priced Ball Bearing Mower on the market.

The strongest feature of this machine is the simple but positive and reliable adjustment of the bearings.

16-in. \$5.75; 18-inch, \$6.25

THE NEWPORT

Similar to the Lakewood, but has Brass Bearings in place of ball bearings. The Revolving Cutter and Bottom Knives of the Newport and Lakewood Mowers are of the same quality and weight as used on many High Grade Mowers of other manufacture.

16-in., \$5.50; 18-in., \$6.00

THE CADET-(8-in. Wheels)

A thoroughly good Mower at a low price. It has large Driving Wheels, Brass Bearings, Patent Flexible Bottom Knife and Ratchets, and Adjustments equal to those used in many makes of High Grade Mowers.

14-in., \$2.50; 16-in., \$2.60; 18-in., \$2.75

O-CEDAR MOPS

A Better and Easier Way to Clean

No more back-breaking to clean and polish the floors; no more crawling under the bed, or moving of heavy furniture; no more climbing up on chairs to dust the mouldings or tall furniture. The O-Cedar Polish Mop gathers all the dust from everywhere and holds it. Does not stir up the dust but collects it.

Cleans and polishes at the same time, putting a high, hard, lasting lustre on all varnished surfaces. There is nothing to equal the O-Cedar Polish Mop for polished floors, linoleums, etc. Gets down into the corners, gets the dust under beds, heavy furniture, radiators, etc. The mop is padded and cannot scratch or mar the furniture.

The only polish mop that can be successfully washed and cleaned and renewed.

It makes easy and pleasant what was hard work. No more getting down on hands and knees to polish hardwood floors.

Price, small, \$1.00; large, \$1.50

O-CEDAR POLISH A Wonderful Varnish Food

for cleaning and polishing floors, furniture, automobiles, etc. O-Cedar is by far the most economical furniture polish as it is used with water. Puts on a high, hard, lasting lustre, and does not leave a bluish cast and gummy surface. It contains no grease, mineral by-product or benzines. Every ingredient of O-Cedar polish is a pure vegetable substance. Positive-

etable substance. Positively will not ignite. It is easy to use. Very little rubbing is required. O-Cedar Polish is well

and favorably known and is widely adver-

tised in connection with the O-Cedar Polish Mop.

BURROWES PRIMUS FOLDING CARD TABLE

The Best Folding Table at a popular price on the market. Always ready for use, never in the way when not wanted. and at so low a price that it is within the reach of all.

This trim, neat table, remarkably strong and well braced, is being used inthousands of homes, club-rooms, sewing rooms, etc., for a great variety of purposes. It has all the convenience of a folding table, with none of the projections or garish trimmings that used to be the rule with this class of furniture.

The illustration shows only the proportions, and does not convey any idea of the real quality of this table. It is beautifully finished in dark mahogany or golden oak color, with green felt or green leatherette top. The less are strongly braced and are self-locking either open or closed. They are rubber tipped to prevent noise and injury to hardwood floors. Size 30x30 inches, height 27 inches, weight 9 pounds.

Price \$2.25

BARN DOOR HANGERS AND HAY CARRIERS

The Myers Adjustable Tandem Stayon Flexible Door Hanger with Steel Roller Bearings

This is the only hanger on the market that can be adjusted perpendicularly so as to locate the door at any point above the ground desired, or laterally so as to adjust the door to or from the building, and will also adjust itself to any thickness of door. The perpendicular and lateral adjustments are made with an ordinary wrench, and at the will of the user. Price \$1.00 per pair

Myers Clover Leaf Unloader

No. 116. For Steel Track. No. 121. For Wood Track.

Represents the new Clover Leaf Unloader made of malleable iron throughout. Is heavy and substantially made. It is fitted with wide open mouth to receive the fork pulley when approaching in any direction. Also has swinging fork pulley, which relieves the carrier from all strain when drawing hay over a high beam or into a well filled mow. The track wheels revolve on % inch turned steel axles. The rope sheaves have longer hub than any other make of carrier. Are 7 inches in diameter with hard Steel Roller Bearings.

Price, \$5.00

The Myers New-Way Adjustable Tandem Door Hanger

For Tubular Girder Track Adjustable to and from Building and to Raise and Lower the Door

The track is made of high carbon stiff steel with two flanges turning downward at the lower edge, making the truss or girders which stiffen the track, enabling it to carry a much heavier load than any other style tubular track. In addition to this, there is no possible chance for dirt to lodge on the inner side of the track.

The adjustable features of this hanger are very important, as they enable the user to adjust the door to and from the building to prevent snow or rain from blowing in. The perpendicular adjustment permits of the door being raised or lowered, as is necessary. especially in cold weather, as in such cases the ground when frozen will heave up, thus locking the door. Can be used on doors varying in thickness from 11/2 in. to 3 in. or more

Price \$1.25 Per pair The Myers "O. K. Adjustable Stayon" Flexible Covered Door Hanger

Patented With Hard Steel Roller Bearings. Pushes and pulls easily. It is impossible to throw it off the track or have the door warp sufficient to prevent its operation. The "O. K. Stavon" is constructed with a malleable frame extending over and covering the wheel. The frame is reinforced by two heavy ribs extending from a point above the axle to the Price \$0.75 per pair hasp. McKenney Door Hanger

No. 10. . . . Eagle Door Hanger No. 1. \$0.50

HAY CARRIERS

Swivel and Reversible for Double Steel Track

Fig. 1031

Figure 1031 represents the new Clover Leaf Unloader made of malleable iron throughout. Is heavy and substantially made. Is fitted with wide, open mouth to receive the fork pulley when approaching in any direction. Also has swinging fork pulley which relieves the carrier from all strain when drawing hay over a high beam or into a well-filled mow. The track wheels revolve on %-inch turned steel axles. The rope sheaves have longer hub than any othermake of carrier. The lock is composed of three parts, and has no springs. The locking device grasps the fork pulley on either side, and permits it to swing free. Price \$3.75 each

Fig. 1032

Has Swinging Fork Pulley—a Great Advantage in Drawing Hay into a Mow When Filled Near the Roof

The above illustration represents the Clover Leaf Unloader as made for wood track. This carrier is fitted with a wide, open mouth to receive the fork pulley. The rope sheaves and track wheels are all fitted with large turned bearings. The machine is both swivel and reversible—combined in one machine. By this device the machine can be reversed by reversing the swivel or by drawing the rope through from end to end.

Price \$3.75 each

HAY CARRIER OUTFITS

When requesting quotations do not fail to give exact length of barn, whether ridge or full rafter, and distance between rafters. Also state whether you expect to hoist from end or center of barn.

ESTIMATES FOR HAY CARRIER OUTFITS

Estimate of material required for a Steel Track Outfit for different length barns:

For a 40-foot barn, One Carrier, 36 ft. Track, 12 Hanger Hooks, 12 Rafter Brackets, 1 Harpoon, or Grapple Fork, 3 Pulleys, 3 Floor Hooks, 120 feet, 34 in. Manila Rope, 50 feet, 35 in. Check Rope 1, Rope Hitch.

For a 50-foot barn, One Carrier, 48 ft. track, 15 Hanger Hooks, 15 Rafter Brackets, 1 fin. Check Rope, 1 Rope Hitch. Special Rope, 15 Feet 18 ft. Standard Net Price, \$20.50

For a 60-foot barn, One Carrier, 54 ft. Track, 20 Hanger Hooks, 20 Rafter Brackets, 1 Harpoon or Grapple Fork, 3 Pulleys, 3 Floor Hooks, 185 feet 34-in. Manila Rope, 65 feet 34-in. Check Rope, 1 Rope Hitch.

Above estimates of Rope are for an End Hoist. In hoisting from center of barn less Rope will be necessary.

It Lasts Longer

If you have any kind of a roof to coverbarns, poultry houses, sheds, etc., for which you want a waterproof siding that will keep your stock and fowls warm and dry, come in and see Paracote.

Paracote is all ready to lay. You can lay it yourself. It is 32 inches wide-the best width for making a good roof. Best because it will not buckle or wrinkle, BUT LIES SMOOTH -and it is easier to handle

It is the most pliable roofing made, yet it is tough-try to tear it.

It is fire-resisting. It is tough as leather. Rain, Snow, Ice, Heat and Cold do not affect it. Come in and see

COVERS MOST

THE COLONIAL PAINT

THE COLONIAL PAINT is a Pure Linseed Oil Paint that has been on the market for many years, and is considered one of the leading brands.

The materials composing this product, carefully treated as they are, make a paint of great toughness and elasticity that has excellent covering capacity and durability.

As the choicest coloring ingredients are used in making this product the richest coloring tone and finest finish is developed, and the building to which it is applied presents a beauty of appearance, which distinguishes it from others in the locality.

THE COLONIAL PAINT is manufactured in forty different shades from which beautiful color combinations can be made, that will not only harmonize with the architectural design of any building, but also with the surroundings, thereby making the property much more attractive, and also increasing its value.

THE COLONIAL PAINT can be sold with perfect assurance that it will meet the demand of every user.

BRONZITE

The Permanent Green Paint

The Sanitary Washable Wall Finish

Made from an ore base, Kolonite, which gives it stability of color.

BRONZITE is recommended for the painting of store fronts, doors, blinds, structural and ornamental work, fences, and in fact all outside surfaces generally where a green paint is desired.

BRONZITE is impervious to chemical action, atmospheric conditions, resists heat and is non-corrosive.

BRONZITE is a specialty green, the green that is different—it lasts, wears and holds its color, and covers more surface than other greens.

BRONZITE is put up in six shades, in paste form in 12½ and 25 lb. pails, also liquid form.

VEL-VE-TA is manufactured under a pattented formula—contains no lead or other poisonous pigments, and although applied to the surface like an oil paint, when dry it is non-absorbent, can be washed with soap and water, and is therefore sanitary.

It dries with a beautiful, soft and velvety finish, which is pleasing and restful to the eye.

It will not turn yellow, crack, craze or peel. It will not show laps, streaks or brush marks.

VEL-VE-TA is recommended for the interior decoration in homes and public buildings, and in factories. It is equally adapted for this use because it effuses light.

A beautifully designed booklet showing combinations, and giving specifications for the application of VEL-VE-TA will be furnished upon request.

COLONIAL INTERIOR FLOOR PAINT

"Made to Walk On"

Excels in lustre, toughness and elasticity. Dries hard over night.

Manufactured in nine colors—Brown, Dust, Yellow, Gray, Red, Drab, Spruce and Green.

COLONIAL WAGON AND IMPLEMENT PAINT

For farm wagons, machinery and implements.

Dries with a high durable gloss.

It is money well spent to protect implements from rust and decay.

COLONIAL VARNISHES

Every varnish offered is especially made and adapted for its particular class of work, and for that work cannot be excelled.

Outside Door Varnish

For outside doors, store fronts, settees, spars and general exterior work.

Bathroom Varnish

For bathrooms, window sills, kitchens, etc.

Interior Finish Varnish

For mantels, balustrades, inside doors, and in fact adapted for the finest grade of interior work of all kinds.

Floor Varnish

For floors, stairs, vestibules, etc.

Cabinet Varnish

For tables, desks, and other articles of furniture.

Forcite (Liquid or Japan)

A very strong dryer, to be used in ratio of 1 part to 15 parts linseed oil.

No. 78 Hard Oil Finish

A light hard oil finish for interior work; flows freely leaving a lustre finish.

No. 1 Furniture Varnish

A heavy bodied varnish for use on ordinary furniture.

N. Liquid Dryer

A strong dryer that will mix readily with oil.

No. 1 Coach Varnish

Light in color, works freely under the brush; suitable for interior work where a moderate drying varnish is required.

Adhesium—Modern Wallpaper Size. For use in preparing almost any kind of surface for the reception of wallpaper, burlap, lincrusta and other heavy wall coverings.

Amalgam Paint—A preservative coating for wood, metal and other exterior surfaces.

Automobile Carriage Paint—For painting and varnishing all kinds of vehicles in one opera-

Colonial Bath Enamel—For use on the tile, metal, wood or other surfaces in the bathroom or about the bath tub.

Colonial House Paint—A standard brand of ready mixed house paint manufactured in forty

Colonial Interior Floor Paint—For coating of interior floors, where high gloss is desired.

Dries hard over night.

Colonial Quality Colors in Oil—Manufactured from purest and strongest pigments that can be obtained.

Colonial Screen Paint-For coating wire screens. Will not clog.

Colonial Wagon Paint,—For farm wagons, machinery, etc. Dries with a high gloss, and protects surface to which it is applied.

Colonial Wax Floor Paint-For outside use only. Very durable.

Chalco Paint and Varnish Remover-For removing paint or varnish.

Dry Colors-High grade in every respect.

Eagle Varnish Stains—A high grade stain and varnish combined.

Eagle White Enamel—For interior decoration of woodwork, etc.

Graining Colors—Guaranteed to be satisfactory to master grainer.

Velveta Concrete Floor Paint—For coating concrete surfaces.

Whitney & Griffin Barn Red—For painting barns, fences, etc. Putty—Evenly ground and of good working value.

Varnishes—Highest grade products in the field.

White Lead-Short fine and of exceptional whiteness.

JAPALAC

Comprises three individual lines of household finishes under one trade-mark name, "Jap-a-Lac," as follows:

Transparent Colored Varnishes,

Gold and Aluminum,

Solid Enamel Colors.

There is a color provided for every requirement of the housewife who wishes to keep her floors, furniture, woodwork, etc., in spick and span condition. There is also Japa-Lac Floor and Interior Varnish (Natural) which is the most durable floor yarnish on the market. Japa-Lac is for use on window screens, screen doors, iron fences, radiators, registers, water pipes, automobiles, wagons, in addition to the most common uses such as on floors, furniture and woodwork.

Slidden

Green Label Varnishes

The name "Glidden" on a label is an absolute guarantee of high quality. Nearly fifty years of experience in the manufacture of varnishes and specialties for all purposes, together with the most modern facilities, insures uniform quality at all times and goods that can be depended upon to give perfect satisfaction. Any person purchasing goods under the Glidden Green Label Brand can feel assured that he is receiving full value. There is a brand made for practically every purpose and at prices which fit any pocket book. Send for price-list.

GLIDDEN'S ENDURANCE WOOD STAINS

Glidden's Endurance Wood Stains are for use on new wood which has never been finished. This line is made in fourteen attractive colors. Their beauty and practicability lie in the fact that an even stain is produced, thus insuring a beautiful, lasting finish. These stains produce the beautiful Mission effect, so much in vogue at the present time, and are also for use when securing a waxed or varnished finish.

Ren-O-Vite

Glidden's Ren-o-Vite is the result of twenty-five years of conscientious work and experiment on the part of an expert; the result being the Ren-o-Vite is unlike the ordinary furniture polishes now on the market, in that it does not give the ordinary greasy polish but a finish which is absolutely free from grease and shines like a mirror. Ordinarily furniture polishes do not clean, but Ren-o-Vite is different; it cleans thoroughly as well as gives a brilliant, lasting polish. You should not overlook trying a small bottle of this wonderful polish and cleaner. You will be pleased with it.

MYERS LINE OF PUMPS

We carry the most complete line of Pumps in this section. We have it whether you want it for house, barn or orchard. House pumps, well pumps, for all conditions including, spraying pumps and pumps for pneumatic water systems, whether hand or power. If it's a Myers it is right.

MYERS COG GEAR HOUSE LIFT PUMP
With Siphon Spout and Glass Valve Seat.
Similar to Fig. 1473 and 1664 only a Plain Lift
Pump instead of Force
PRICE LIST

No. R245, House Lift Pump 3 in, Br. Cyl., Tap-

Fig. 1664

Our Brass Lined Cylinders are constructed with an outer shell of cast iron, in which is placed a heavy seamless drawn brass tube, ends of which are swaged out by our patent roller process to fit bevel on outer shell. They are fitted with our single or double leather plunger, and are guaranteed to give satisfaction.

Myens Brass Cylinders, with Glass Valve Seat, capped outside, are especially adapted for drilled wells of small diameter. They are made of plunger, and are first class throughout, to which we invite the most critical examination and comparison with other makes. Experienced well and windmill men invariably use our cylinders when acquainted with their advantages. When installed, they save many expensive trips and much annoyance—the job is satisfactory from the time it is finished.

Liberal Discount from List Prices

No modern residence or farm house is complete without a good adequate supply of pure water, and the most satisfactory and efficient supply is maintained by the use of a Guaranteed Pneumatic Water System such as installed by us.

Double Riveted Air-Tight Pneumatic Water Tanks will give you all the benefits of a city water works with no water rent bil's to pay.

Have running water in your kitchen, bath-room, barn and other buildings and secure at the same time, fire protection for your property. It solves the problem for the suburban

home, the club-house, the summer cottage, and incidentally other problems.

Pressure Tanks can be operated by pumps using

wind mills, gasoline engines or hand power.

Fig. 106 represents a system operated by a hand pump. You can get some idea how cheaply these systems can be installed when you realize that we can furnish you one 30x6 tank, 220 gal. capacity including one Double Acting Air and Water Pump, one Air Pressure Gauge, one Brass Gate Valve, one Water Gauge, one Faucet, one Stop and Waste, one Swing Check Valve, all for around \$70.00

FITTINGS

We carry a full line of engines, pumps, galvanized pipe, malleable fittings, brass fittings, such as faucets, check valves, etc.

Fig. 106

WOOD TANKS

We are also in position to furnish all sizes in Wood Tanks and will quote promptly on any sizes desired and furnish a first class reliable tank.

GARDEN CULTIVATORS AND SEEDERS

NEW UNIVERSAL DOUBLE WHEEL HOE CULTIVATOR, PLOW AND RAKE No. 14.

The special design of a Double Wheel Hoe is the working of the row at one passing, but it may also be used as a between rows cultivator.

NEW UNIVERSAL HIGH ARCH EXPANSION WHEEL HOE, CULTIVATOR, RAKE AND PLOW

No. 26.

The wheels are 12 in. in diameter, and the Arch high enough to cultivate over plants 20 inches or more in height. Our Double Wheel Hoe already meets all requirements but we present here, if possible, a more complete implement of larger size. Attachments with this Hoe as follows: One pair each, Long Bladed Hoes, Short Bladed Hoes, Narrow Cultivators, Wide Cultivators, Plows, Rakes, Vine Guards, one only Center Cultivator and one Center Tooth Holder. Net Price, \$8.75

A Double or Single Wheel Hoe at Will

NEW UNIVERSAL SINGLE WHEEL HOE, CULTIVATOR, PLOW AND RAKE

This Single Wheel Hoe can be used in straddle cultivation by setting the wheel on one side and bringing the rows of plants under center of frame. Later cultivation to be done between rows. Attachments are: One pair each Narrow Cultivators, Wide Cultivators, Hoes, Plows, Rakes, one Center Cultivator and one Vine Guard. Net Price \$5.25

GARDEN CULTIVATORS AND SEEDERS

MATTHEWS NEW UNIVERSAL GARDEN DRILL, NO. 16

This machine is acknowledged by all seedsmen and gardeners to be one of the leading and most reliable seeders made. Will plant accurately all kinds of garden seeds. Has patent Indicator for regulating the dropping of the seed. This Seeder can be used as a drill or can be converted at will into a Hill Seeder dropping distances of 4, 6, 8, 12, 16, 24, and 48 inches apart. Net Price \$8.25

MATTHEWS NEW UNIVERSAL COMBINATION HILL AND DRILL SEEDER, CULTIVATOR, PLOW, RAKE AND MARKER

No. 22.

In this Implement we present a combination of the No. 16 Hill and Drill Seeder illustrated above and No. 26 High Arch Expansion Double Wheel Hoe illustrated on the previous page. This combination gives the user a One Wheel Seeder and a Single or Double Wheel Cultivator. Very easily changed from Seeder to Cultivator by re-moval of two bolts. We furnish with this the following attachments: 1 pair 8-inch Hoes, 1 pair Narrow Cultivator Teeth, 1 pair Wide Cultivator Teeth, 1 Center Cultivator Tooth, 1 pair Plows, 1 pair Rakes and 1 pair Vine Guards. Net Price \$11.00

MATTHEWS NEW UNIVERSAL CONSTELLATION SEEDER, HOE, CULTIVATOR, PLOW, RAKE, MARKER

No. 119.

Our High grade garden Seeds should be used with the above seeders.

The illustration shows the complete implement with all attachments furnished. In the Constellation is represented a brilliant assemblage of the New Universal Garden Drill. and the New Universal Wheel Hoe, Cultivator, Rake and Plow, for use either as a one-wheel or two-wheel Seeder, Hoe, Rake, Cultivator, Plow, Marker. Six implements in one. Each implement is entirely separate from the other and the only parts used in each, the wheels and handles, are changed from one frame to the other by only two bolts. Cultivating attachments are shown detached. They consist of 1 Cultivator Frame, 1 pair Hoes, 1 pair Plows, 1 pair Rakes, 1 pair Narrow Cultivator Teeth, 1 pair Wide Cultivator Teeth, 1 Center Cultivator Tooth, 1 pair Markers.

Net Price \$10.25

Price \$10.50

NEW JOHN DEERE TWO-WAY SULKY PLOW

With the Auto Foot Landing Device

CONSTRUCTION

The John Deere Sulky Plow represents the highest type of material and workmanship that is possible to procure. The entire frame and beams are constructed entirely of high carbon steel, hence are very strong and durable.

The new style foot landing device is the most satisfactory ever used and by its use and the horselift operated by foot power the plow can be operated very easily.

Extra wide and long steel frame. Track wider than the ordinary plow, making it run steadier and less liable to overturn.

THE SYRACUSE REVERSIBLE SULKY PLOW

FOR HILLSIDE OR LEVEL LAND

For a great many years the Syracuse plows have been among the most popular in New England and their work easily gains them that distinction.

These plows are equipped with Hardened Steel Mouldboard, Steel Landside and Chilled Frog and Share. Furnished with either two or three-horse equipment.

Prices and Special Circulars mailed on application

JOHN DEERE WALKING PLOW

GENERAL PURPOSE SERIES

The Share is hardened Soft Centre Steel, which may be drawn out and resharpened when dull. The Mouldboard is Soft Centre Steel and Double Shinned by welding a piece of solid steel to the edge where the hardest wear comes. The Landslide is thicker by far than is to be found on any other Plow and is fitted with a runner, or slip heel, which takes all wear from the bottom and reduces friction. Information regarding sizes and price on request.

SYRACUSE DIAMOND SWIVEL PLOW

This type of Side Hill Plow has always been very popular in New England, being light, but still having great strength and good turning qualities. Easy shifting clevis and also automatic shifting Coulters except on small size.

Furnished in three sizes: Small One-horse, Medium Two-Horse, and Large Two-Horse.

This type has also been very popular in Maine. It has the well-known Syracuse straight style of Beam, which gives ample clearance room. No. 443. Small Two-Horse. No. 442. Large Two-Horse.

SYRACUSE COMBINATION WALKING PLOWS

This particular pattern is one of the best suited for conditions in this territory. Fitted with Hardened Steel Mouldboard, Steel Landside and Chilled Share. No. 32—Medium Two-Horse. No. 31—Large Two-Horse

SYRACUSE CONTRACTORS' PLOW

Hard iron wearing parts. Extra heavy Beam, Share and Strip Steel Wheel Frame. Loop Handle wear Irons. An excellent Plow for general grading purposes.

SPECIAL CATALOG ON SYRACUSE PLOWS MAILED ON REQUEST

DEERE MODEL B DISC HARROW

A REALLY FLEXIBLE DISC HARROW

Only Harrow manufactured having third lever giving spring pressure on gangs. High steel frame, Oscillating scrapers with lock off device. Gangs work independent of each other. Oil tubes extending to top of frame. Furnished with 16, 18 or 20 inch discs, either plain or cutaway.

The User of a Deere Disc Harrow is always a Satisfied Customer.

Model K with Tongue Truck

The Deere Model K Harrow has the same high quality and material but does not have quite as heavy a frame nor the third lever, consequently selling at a lower price.

Send for Booklet on "Bigger Crops from Better Seed Beds."

DEERE DOUBLE ACTION DISC HARROW

One working of the DEERE DOUBLE-ACTION HARROW accomplishes more thorough pulverization of the soil than two separate operations because with this harrow the second working takes place immediately after the first, and the partially broken-up soil does not have time to dry out and is, therefore, more finely pulverized by the action of the second section of the

harrow. We recommend using plain discs on the front section and cutaway discs on the rear section and by their throwing in opposite directions the greatest efficiency in a harrow will be obtained. The front section can be used alone any time desired.

Special Circulars and prices on application.

DEERE MODEL R ORCHARD HARROW

This harrow is constructed to especially meet the requirements of orchard cultivation and it can also be used as an ordinary harrow. The Gangs are reversible for in or out throw and are adjustable in or out on the harrow frame and extension frame.

By use of an extension frame the gangs can be spread to a distance of over ten feet between them. This allows cultivation under overhanging branches. Can be furnished in either 4, 5 or 6 ft widths. Unexcelled for orchard work.

Send for full descriptive catalog and prices.

DEERE NO. 7 COMBINATION TONGUE TRUCK

The New Deere Combination Tongue Truck and Fore Carriage illustrated herewith will fully meet the requirements of all dies harrow users. It is simple, strong and compact in construction. The hitch is made to the vertical standard and the truck therefore turns and is controlled in its movements by the direction of pull on the eveners. The axle is pivoted in the center allowing either wheel to pass an obstruction without any strain whatever. The wheels are solid steel with wide oval tires and with closed bearing boxes. By simply changing tongue iron can be changed from two to three horse litch.

Can also furnish No. 5 Truck for wood stub tongue.

Send for special circular giving full description.

SYRACUSE SPRING TOOTH HARROWS

Construction

Frame bars of angle steel are thoroughly protected by steel shoes, doubling the life of the harrow. Frame bars are raised at the rear ends to give free outlet to trash,

Tooth bars of channel steel journaled in malleable brackets above the frame, which give the teeth high and great range of adjustment for depth of cultivation and clear-

Use a Van Brunt Fertilizer Drill

The drill that puts any seed, from alfalfa to bearded oats, at the bottom of furrows of even depth, without choking up and failing to sow part of the field or planting too much in other parts. All grain is ready for harvest at one time. Any standard fertilizer is handled by the Van Brunt just as accruately as seed.

Send for Colored Booklet.

Send for Special Circulars and Prices DEERE WHEELBARROW SEEDER

Grass Seeder sows clover, timothy, alfalfa, etc., also all chaffy seeds, such as red top, orchard grass, clean blue grass, etc.

Grain Seeder sows all small grains, such as oats, wheat rye, barley, etc.

The quantity of seed is accurately governed by the wheel, which moves correspondingly slow or fast, as the machine moves over the ground. The seeder is operated by a cam device attached to the wheel, over which the lever that works the seed chain runs. The feed is instantly changed by changing the position of the pin in the index plate. This seeder does not injure or bunch the seed, but distributes it evenly over the

Deere Wheelbarrow Grass Seeder with 14-foot Hopper Deere Grain Seeder Attachment

ground.

Price \$8.50 . 4.00

EMPIRE BROADCAST FERTILIZER SOWER

The Empire 8-foot Broadcast Fertilizer Sower is especially designed for sowing a large quantity of lime or ferizer per acre.

It has a positive force feed, which insures accuracy in the quantity sown.

The scattering tubes are constructed so as to deliver the fertilizer or lime in an even sheet over the ground.

The capacity of the Empire, as regularly equipped, is from 150 to 1,400 quarts of fertilizer; from 375 to 1,500 quarts of lime per acre. We can furnish gears that will sow a greater or lesser quantity if desired.

STROWBRIDGE BROADCAST SEED SOWER

It is a simple, effective seeding apparatus complete in itself which may be attached in a few moments' time to any farm wagon or other vehicle

Price, \$7.25

Price, \$7.25

HOOVER IMPROVED POTATO DIGGER

There is probably no implement so well known in potato-growing sections as the Hoover Elevator Potato Digger. In Aroostook County, Maine, where more potatoes are grown than any other section in New England, and where a potato digger gets a severe trial, the Hoover has given perfect satisfaction. Its success can be attributed to the fact that it was built to withstand most trying conditions.

It hardly seems necessary to go into detail regarding its points of merit, for its success is guarantee enough for its superiority in design, construction and efficiency in the field.

We do wish to call particular attention to the vine separator used on the Hoover, which delivers the vine, weeds and trash to one side of the row, leaving the potatoes exposed to view and readily accessible.

Send for descriptive catalogues which contains convincing testimonials from most enthusiastic purchasers.

New Steel Sides and Roller Bearings throughout.

THE PURCHASE OF A HOOVER IS NEVER REGRETTED

FULL DESCRIPTIVE BOOKLET ON REQUEST

THE SHAKER POTATO DIGGER

A most excellent working Digger under reasonable conditions. Is equipped with perfectly flat blade so as not to cut the potatoes. The weed fender clears away the weeds and vines.

Regularly furnished with weed fender, fore carriage and side wings. Price, \$17.00

DEERE POTATO DIGGER

The Deere Potato Digger has been in successful use for many years, and is equal to any requirement that may be made on it. It works with very light draft, and throws the potatoes out of the ground without cutting, leaving the ground in good shape.

Price, \$8.50

No. 28 Little Giant Potato Sprayer

Can also be used for orchard or field spraying.

Specifications, Little Giant Sprayer

TANK. Best 7/8-inch Heart Cypress. 65-gallon capacity, or 50-gallon barrel.

PUMP. Double action, 2-inch plungers. Equipped with clutch so that it is in operation only when actually spraying. Equipped with hand attachment for tree spraying.

AGITATOR. Rotary driven by a sprocket and always in operation when machine is moving.

POWER. Chain drive from axle. Power derived from either wheel. All machines tested to 200 lbs. pressure.

EQUIPMENT. Four row boom equipped with Mistry Nozzles, Pressure Gauge, Relief Valve, By-Pass, Convertible Pole. Viz: Can be spread and used for shafts when it is desired to use one horse, 44-inch steel wheels, 2½-inch tire, Axle 15% inch C. R. steel. Wheels adjustable in width from 4 to 6 feet.

Send for Special Circulars and Prices

IRON AGE SPRAYERS. We carry a complete line of these potato Sprayers with either single or double acting pump.

Send for Full Descriptive Booklet and Prices.

The Dunham All Steel Land Roller

The only roller bearing Land Roller manufactured. These Rollers have closed heads preventing any stones, dirt or any material from gathering inside the drums. Frame and brackets of heavy channel steel making it strong and durable. The Roller Bearings cut the friction in two making the draft much less. Hard grease oil cups supply the bearings. Furnished in 24, 26 or 30-in. diameter.

Send for Special Booklet on these Rollers.

Features That Characterize the Dain Vertical Lift Mower

Compensating Gears—That remove strain from the bearings and transmit instead of consume power.

Long Pitman Shaft—That has all end thrust removed, hence has no need of thrust bearings.

Alignment of Cutter Bar—Seldom necessary, but easily, quickly and positively made.

Centering the Knives—So that they always register perfectly in the guards, insuring perfect work.

Vertical Lift—A lift so easy to operate, an ordinary boy handles it readily.

An Easy Foot Lift—So easy it's surprising, especially after using other kinds.

Adjustable Draft Hitch—Instantly set to remove side draft in the most severe conditions of work.

Material and Workmanship—Of the known Dain standard proven by service reliable and trustworthy.

SEND FOR SPECIAL DESCRIPTIVE BOOKLET

Showing Ease of Handling Johnston No. 14 Lever Fold Mower in Passi ng Over Obstruction This Mower is strong, durable and very light draft, 34 in. drive wheels. Roller bearness. Wide truck. Long drive pitman. Long horizontal crank shaft. Excellent working

Complete Catalog of Johnston Machines on request.

JOHNSTON STEEL RAKE

All steel, but the combination pole and shafts. Double hub steel wheels, angle steel frame with truss. Long flat pointed teeth. Light draft and clean working. Strong and durable.

Furnished in 8, 9, 101/2 and 12 ft. sizes.

Prices and Circulars on Request.

THE JOHN DEERE STEEL RAKE

A FEW ESSENTIAL FEATURES

The axle stubs are one and one-quarter inch in diameter, also reversible and interchangeable, which adds longer life.

The dump rods are three-quarter inch in diametter, and of high carbon steel. These are reversible and interchangeable, making four times the durability of the ordinary type.

The tooth holders are constructed of steel instead

of cast iron saving much breakage, and they are also made to accomm odate a minimum or maximum number of teeth.

SEND FOR SPECIAL FOLDER ON THIS RAKE

NEW YORK CHAMPION WOOD RAKE

For years the New York Champion Rake has been the best known and most successful wood rake in use in this locality.

We would certainly recommend the above to our customers who do not desire a steel rake. It is carefully and substantially built, and nothing but the best of material is used in its construction.

SEND FOR CIRCULAR

JOHNSTON STEEL TEDDER

Johnston all-steel Tedders are strong and durable, and work most satisfactorily. The frame is steel, the wheels are steel and double hubbed. Three sets of roller bearings on the main shaft insure its light running. Three tined crucible forks are used; the spring on the fork is located behind it, and does not come in contact with the hay and get tangled in the rod and spring. Another feature is the spring balance tilt. The Johnston is equipped with combination pole or shafts. Made in two sizes, 6 and 8 fork.

KNIFE AND TOOL GRINDER

Grinder is convenient for use in field as it can be readily attached to mower wheel by thumb-latch which holds grinder in position. This grinder does its work perfectly, lever gives operator perfect control so that nicks can be ground out and shape of stone insures sections being ground with their original bevel. This grinder can also be furnished on specia order as a foot power machine.

JOHNSTON CONTINENTAL CORN BINDER

Built for Business

Light compact construction. Steel frame, wheels and beams. Light draft with no side draft. Large main drive wheel gaining power. Roller bearings. Only machine with automatic gates. Two horses will handle the machine.

Send for Special Booklet.

JOHNSTON CONTINENTAL GRAIN BINDER

Strong, Durable, Efficient

Steel construction. Main drive wheel 36 in. giving great power. Roller bearings in both wheels greatly reducing draft. A trip that will never repeat and a knotter that always ties. Sold under a positive guarantee.

Special Booklet on Request.

NEW DEERE HAY LOADER

FOR SWATH OR WINDROW

An Economy

Where hay is grown in any quantity, the saving in time, labor, and quality of product effected by a hay loader will often wipe out the purchase price the first year used and thereafter become a source of clear profit.

A Desirable Loader

The most desirable hay loader is the one that combines to the greatest degree durability, capacity, and efficiency. This describes the NEW DEERE LOADER in a nut shell. It is very durably constructed, yet light in weight, will pick up any quality and condition of hay either from the swath or windrow and do it as clean as any rake.

Send for Full Descriptive Catalog.

The Dain Side Delivery Rake has a frame of strong steel construction giving great durability. Has strong steel raker teeth sufficient to rake and deliver the heaviest crop of hay, also having perfect flexibility when striking an obstruction.

No farmer cutting a quantity of hay can afford to be without one, especially if using a hay loader.

Leaves the hay in a long, continuous windrow in the very best condition for curing. Will shake water from grass in as satisfactory way as a tedder. Let us zend you booklet giving full description and prices.

BINDER TWINE

We carry the Standard Binder Twine, which grain raisers. The fibre is long and runs very has given such excellent satisfaction to the even. Write for prices.

OHIO "RAPID" ROOT CUTTER AND PULPER

The knives are double-edged and reversible, one being straight for slicing, the other edge being grooved, thus dividing it into separate bits for pulping.

The knives are adjustable to the cutting plate, which is to gauge the thickness of the slices and to counteract wear in the knives.

. Capacity—Capacity per hour, slicing or pulping, hand, 30 bushels; power, 125 bushels.

Pulley—Size of pulley for power, 10x4 inches. Weight, 215 pounds, with pulley.

Size and Price

No. 2 Root Cutter and Pulper, 6 knives, for hand \$14.50 No. 2 Root Cutter and Pulper, 6 knives, for hand or power

OHIO LEVER CUTTER

The "Ohio" Lever Cutter will cut hay, straw, corn stalks and every kind of feed. It is equipped with one 11-inch oiltempered knife; also provided with a guard plate, adjustable to vary the lengths of cut.

It is nicely finished, of pleasing design, strong and dumble.

"Ohio" Lever Cutter, weight 55 lbs. \$4,25

PONY HAND FEED CUTTER

The Pony Cutter, as illustrated below, is strictly a hand, machine.

A bushel of hay can be cut in thirty-five seconds. Cuts all kinds of feed. Only high-grade material is used, and makes it a strong and efficient cutter.

No. 111/4. One 111/4 inch knife cut 1/2 to 2 inches, weight 165

"OHIO" HAND CUTTER

The No. 8½ "Ohio," as illustrated below, is built along the same general lines as the power cutters. It has great capacity, is strongly built, and is a high-class cutter in every way.

No. 8½. With two 8½-inch knives. Cuts ½, ¾, or 1½ inch. Weight, 165 lbs. \$16.00

The R and V Triumph Gasoline Engine

Hit-and-Miss Governing-Hopper Cooler 1, 2, 4, 6, 8, 10, 12, 16 Horse Power

This nigh grade type of Engine has proved very practical and satisfactory to our customers on account of its light weight, simplicity and ease of operation. Being hopper cooled does away with all water pumps and tanks. Has solid cast iron sub-base in which the gasoline is stored and taken by suction feed thereby doing away with a gasoline pump and being accepted by Insurance Underwriters. Has ball governor and thumb screw, so the operator can regulate the speed at will.

Send for full description and prices.

FIELD GAS ENGINES— A first class water cooled engine at very moderate cost. Sizes 1½, 3, 4, 5, 7, 10, H. P. Full information and prices on request.

The "New-Way" Air Cooled Engines

6 H. P. Single Cylinder Horizontal

"Goes and Goes Right

The "New-Way" is the only air cooled engine made in all sizes from 1½ to 12 H. P. Absolutely guaranteed to cool perfectly by air only. No water to freeze or to watch. Crank case is air tight allowing no dirt to get into the working parts. Valves can be removed and replaced in five minutes. No gasoline pump to cause trouble.

Can equip these Engines with either batteries, friction driven magneto or Bosch high tension Magneto.

Furnished in 2½, 3½, 4½ and 6 H. P. Vertical type, and 1½, 2½, 6, 8 and 12 H. P., Horizontal style.

Full information and prices on request.

IMPROVED WOOD AND POLE SAW FRAMES

TILTING TABLE WOOD SAW Weight, 275 Pounds

ances perfectly and is easy to handle. The sliding table is fitted with grooved rollers, which run on a "V"-shaped track, and is very easy to operate. The arbors are true and heavy. They run in long, babbitted bearings, and are fitted with a 95-pound balance wheel. On pole saw frames the connection between the two arbors is made by running belt over idler pulley.

Note. All our Wood and Pole Saw Frames

are made right hand, unless otherwise ordered.

TILTING TABLE POLE SAW Weight, 350 Pounds

Weights shown above are for machines without saw blades. Saw blades weigh about as follows: 20-inch, 8 pounds; 22-inch, 10 pounds; 24-inch, 14 pounds; 26-inch, 17 pounds; 28-inch, 20 pounds; 30-inch, 24 pounds.

PORTER PERFECT BARN EQUIPMENT

We are in position to furnish complete barn Outfits of the most improved type including Stalls, Stanchions, Hay and Litter Carriers, Water Basins, Mangers, etc. Estimates and information gladly given and if building new or rebuilding your old barn will furnish without charge Blue Prints giving most improved construction.

The Porter Litter Carrier shown above is a high-class machine, built for heavy service. The tub is four feet long and two feet wide, with a capacity of 12½ cubic feet, or 800 pounds of wet manure. It is built of heavy, galvanized steel, reinforced with rolled steel angle one inch wide all around the top and along the end seams. Most perfect lifting device found on any Carrier. Furnished with chain hoist if desired.

PORTER STEEL STANCHIONS

These Stanchions are made of high carbon U-bar steel and are amply strong. The lock is simple and positive in action. Can furnish with wood liming if desired, also small size for calves and extra heavy for bulls.

SEND FOR FULL DESCRIPTIVE CATALOGUE

THE NEW MODEL SIMPLEX CREAM SEPARATOR Self-balancing Bowl, Link Blade Device

A DAIRY NECESSITY

The most successful dairyman is the one who produces the greatest amount of dairy products in proportion to the cost. This cannot be done without the use of a good cream separator. Every farmer, who keeps even a few cows should have one, because it will save him money and relieve him of much drudgery.

OLD METHODS WASTEFUL

The old methods of handling milk are wasteful in that much of the butter fat is lost. A separator saves this loss because it skims the milk clean, getting all the butter fat which can be made into butter at home, or delivered to the creamery much more easily than the whole milk.

The Improved Simplex Separator should appeal to every intelligent and discriminating dairyman or farmer for the following reasons:

- 1. It is the most efficient and gets all of the fat that can be obtained from the milk by any process.
- 2. It is self-balancing, and will not give trouble as other machines do.
- 3. It is the lightest running, and can be operated by any member of the family.4. It is the simplest machine, having the
- fewest parts.
- 5. It can skim cold or warm milk, and will not clog up.

The LINK-BLADE Bowl complete. This bowl, 900 lbs. capacity, is only 4½ inch diameter, 5 inch deep, and runs at only 7700 R. P. M.

Note the heavy, compact construction and convenient height of supply-can and discharge spouts. The top of the supply can is only 3% ft. from the floor.

Some advantages of the Link Blades are as follows:

- 1. Increased capacity of from 30 to 50 per cent. over the most efficient of previous devices, combined with very clean skimming under a wide range of conditions as to milk, temperature, etc.
- 2. Great convenience in cleaning and handling, because the blades do not come apart, and do not have to be reassembled in any particular order.
- 3 The device being expansible and fitting the bowl snugly, it can never become loose, of balance.
- 4. The pressure being transmitted through a series of brass rivets, there is no strain on the blades themselves, and there is no rusting formed by the points of contact of the rivets.

Specifications of "SIMPLEX" LINK-BLADE CREAM SEPARATORS.

| N, | Guaranteed Capacity per Hour | Diam. of Bowl | Depth of Bowl | Price |

THE CHATHAM CLEANING, GRADING and SEPARATING MILL. AND BAGGING ATTACHMENT

Attachment to run by power, if you want it. The Bagger is adjustable. Can be attached or detached in an instant. No Screws, Bolts or Nails to contend with, simply throw off the drive chain, place foot upon board which connects Bagger to Mill at the bottom then lift up the Mill and the Bagger is detached.

60 Bushels Per Hour

CROP IMPROVEMENT

To sow large, plump grain, such as results from sensible system of grading with a good mill, means a direct increase taking it one year with another, of from 10 to 25%.

THE SHARPLES MECHANICAL MILKER

Every man keeping a fair sized dairy should be interesed in this milker for the following reasons:

First .- The cost of milking cows can be reduced seventyfive per cent., or you can milk four times as many cows with the same number of men.

Second.-One operator and one boy, to milk and assist, can properly milk one hundred cows in less than two hours. giving independence from hired help in case of necessity.

Third.-The improvement in the cow's condition, resulting from the thorough, quick, gentle and regular work of the milker, will induce an increased milk production.

Fourth.—A far purer product; lower bacterial count and more valuable milk is assured, because all stable air is entirely excluded and the milking parts are so easily and thoroughly cleansed.

These statements are based on close and extended observation of large numbers of these milking machines in actual operation, under widely varying conditions for long periods of time.

Sharples Separator Co.,

West Chester, Pa.

Dear Sirs:

We have been using your milker purchased of Haskell Implement & Seed Co., and find

it to be perfectly satisfactory in every respect.

Have had the milk tested from every cow and have gotten an average of 800 bacteria; the lowest count was 200.

Will heartily recommend your machine for anyone wishing to produce clean milk or production.

Very truly yours, (Signed) E. F. BOWNESS, Mgr. Rox-Holt Farm.

Auburn, Me.

The above count of 800 was average from 10 samples. Counts were made from agar plates after 24 hours incubation at 37 degrees, Samples plated about 18 hours after milking. Respectfully, (Signed) HORACE F. RYDER, Phc.

Auburn, Me., Jan. 30, 1914.

NO. 25 STEEL FARM TRUCK

The above cut represents one style in our low-down farm gear. These are especially desirable where one desires a medium priced truck which is both light and strong, and well fitted for common farm purposes. Un-

excelled for use in mounting spraying rigs, saw outfits, engines, etc. We can furnish these fitted with either wood or steel wheels, and they are commonly equipped with 31/4 x 10 inch skeins and 4 inch tires.

Full Descriptive Catalog and Prices Gladly Mailed on Request

THE FREEMAN STEEL WINDMILL

The Windmill is recognized by everyone to be one of the most efficient and cheapest powers obtainable for pumping water and the large number of these we install every season proves they are very satisfactory to our customers.

The Freeman, without a doubt is the strongest and most durable windmill made. Its simplicity of construction commends it to all buyers. Every detail part is made the best the manufacturers know how, making a faultless combination which cannot be equaled. A windmill that will do more work, stand harder service, require less repairs and will give you better satisfaction than any other mill on the market. If it doesn't we will right the wrong.

FREEMAN 4-POST STEEL TOWERS

This cut illustrates the lower ten feet of our 30-foot, fourpost angle steel tower. This illustration shows the thoroughness of the bracing employed in the construction of all our towers.

This strong tower is not to be compared with the cheaply built 3 post towers on the market, and we have no hesitancy in guaranteeing it under all conditions. One can hardly afford to take chances with an inferior tower and run the risk of a damaged mill and tower.

ESTIMATES

We will be pleased to estimate cost of water supply where windmills, towers, substructures, pumps and wood or pneumatic tanks are used.

WRITE FOR SPECIAL CATALOGUES AND PRICES

DAVENPORT ROLLER BEARING STEEL FARM WAGON

Roller bearings reduce draft 30 to 50%. Gear built of I-beams and channel steel making strongest construction possible. No dish to wheels giving full strength and full width of tire on road. The Davenport being almost entirely a steel wagon means it is not affected by weather conditions, consequently no trouble from drying, rotting or setting of tires.

DIAMOND ONE-HOLE SHELLER WITH FAN AND TABLE

The Diamond is a right-hand sheller, well built in every way, easy running and efficient in removing all the corn from the cobs. It is an excellent separator and cleaner, delivering the corn from the sheller in good, marketable condition.

The sheller is of pleasing design, well built, strong and durable.

SUBURBAN ELECTRIC LIGHTING AND POWER SYSTEMS

The object of the Dean Homelite Plant is to provide for the isolated home, conveniences that are found in the city home today. Thus, the farmer is now enabled to do his chores by light that is practically as clear as day light and eliminates danger of fire caused by using lanterns and lamps. The housewife is made happy by the advent of electric lights in her home. No more kerosene lamps to fill and wicks to trim, no more offensive odors and filthy labor to perform, and fire dangers are eliminated and insurance cost reduced.

RATING

Dean Homelite Plants are rated on the basis of using 30 volt, 20 watt, 16 candle power Tungsten lamps. We have selected the 30 volt system as the safest one for the average home-you being protected from electric shocks,

The Dean Homelite Plants consist of a storage battery, generator and switch board. The generator is mounted on skid with engine and everything is assembled in the most

If you are interested in a lighting outfit of the above nature we would be pleased to send you a complete catalog or send our representative to call on you, or by giving us the necessary information by answering questions below, we can estimate the cost to you.

Total number of 16 C P lamps to be used during the day.

Total number of 16 C P lamps to be used during the evening. Total number of 16 C P lamps to be used during remainder of night.

Give number and kind of electric devices and hours of service which will be used. such as fans, motors, washing machines, flat irons, vacuum house cleaners, coffee percolaters, power motors for pumping, cream separators, etc.

Number of rooms in house which are to be wired.

Number of out buildings to be wired.

Approximate distance in feet from house to each outbuilding.

SEE FOLLOWING PAGE FOR TESTIMONIALS

HASKELL IMPLEMENT & SEED CO., LEWISTON, MAINE

SUBURBAN ELECTRIC LIGHTING AND POWER SYSTEMS

TESTIMONIALS

W. Poland, Me., April 23, 1914.

Haskell Implement & Seed Co., Lewiston, Me. Gentlemen:

I enclose check in settlement of lighting plant, and wish to say that I am greatly pleased with same. The plant works perfectly, and the family are greatly pleased with the installation. I shall be glad to have any of your firm visit my home with any parties who contemplate installing plants, as I feel certain that with thorough investigation you have a system that is as good as the best. Again thanking you for the many courtesles extended, and the promptness of execution, I remain,

Yours truly, (Signed) BERT M. FERNALD.

Winterport, Me., Jan. 24, 1914

Gentlemen:

The lighting plant has been all that you agreed and given entire satisfaction. It is simple to operate and requires very little care. Doing chores with a lantern is like doing them in the dark after having used your plant.

E. O. SHAW.

Sirs:

Alfred, Me., Jan. 24, 1914

It gives us great pleasure to add our testimonial about the Electric Light Plant which you have just installed for us. It works perfectly and gives us great satisfaction and with very little expense. Would recommend it to any one. We also thank Mr. Lewis for the able manner in which he installed the plant.

FRANK RUSSELL & SON.

Norway, Me., Jan. 24, 1914

Gentlemen:

The Dean Lighting Plant that we bought of you is giving the best of satisfaction. We get all the light we want and where we want it. We run the Generator twenty minutes every night before we separate and stop as soon as we finish. The lights are perfectly steady, and we do not see any flickering which we think is very fine.

B. TUCKER & SON.
Wales, Me., Jan. 26, 1914

Gentlemen:

We are very glad to inform you that the Dean Homelite Electric Lighting System you installed for us about a year ago has proven very satisfactory in every respect. We find it economical and simple to operate and would not do without it and go back to the old lamps and lanterns for a great deal more than it cost. By charging battery twice a week, it gives us all the light we want in house, shed, stable, barn and two cellars.

A. C. FROST & SON.

Turner, Me., Jan. 24, 1914

Dear Sirs:

In regard to the Dean Electric Plant that I bought of you and installed last April, 1912, will say that I am more than pleased with it. The cost of running is very small. I never bought anything that gives me the satisfaction the Lights do.

S. W.CARY.

Auburn, Me., Jan. 24, 1914

Gentlemen:

Replying to your recent communication relative to the electric lighting plant you installed on my farm at West Auburn, would say: It has done everything you claimed for it, is dependable, economical, safe and solves the problem of isolated highting in a very satisfactory manner. This with the water system which you installed brings the comforts and conveniences of the city to the rural districts, no matter how isolated they may be. W. J. RENWICK. M. D.

Turner Center, Me., Jan. 24, 1914

Gentlemen:

I installed one of your lighting plants in March, 1913. Will say it is all you claim it, and has not been found wanting in any respect whatever. Would not have the plant taken out for double the cost, unless I could have another installed.

E. W. ANDREWS.
